

Day 1 Oct 27 2025: I came up with my idea and have created my slideshow format to start creating my scene fair idea, I have already labeled all of the slides and started picking out the theme, I have even started typing in the variables, materials, etc.

Day 2 Oct 31 2025: I am currently continuing to edit my slide and prepare for my experimenting when I eventually do it, soon I hope to start gathering the materials.

Day 3 Nov 5 2025: Today I have started my second research slide, and have continued to edit my other slides.

Day 4 Nov 6 2025: I have finished my second research slide and started my instructions slide even though I technically haven't started my experiment yet. but I know what I want to do, plus if I change what I'm gonna do I can just edit the slide. I had previously ordered powdered microplastics but my order just got cancelled so I'm gonna need to find another way of making microplastics.

Day 5 Nov 13 2025: I figured out another way of making microplastics by cutting up dish sponges and wash brushes. Today I got another research slide plus other sides as well, such as the hypotheses, question, variables, etc.

Day 6 Nov 17 2025: today I have been focusing more on background research slide 1, 2, and 3 while also making sure to put the sources on the citations.

Day 7 Nov 24 2025: the slideshow is looking a little small so I added all the pages I will need for the experiment, and I'm also adding to the sources of error because I think I may have forgotten to add a few of the websites to the citations.

Day 8 Dec 1 2025: today I didn't do much except for more research and citations.

Day 9 Dec 4 2025: I didn't really do much today other than work on materials and citations.

Day 10 Dec 16 2025: today I worked on variables, research, procedure, and materials. There was a lot to do today so I edited a bunch of the slides while also almost finishing research part 4, so soon I will be able to start research 5.

Day 11 Dec 17 2025: today I edited every single slide along with the background although I think I'm gonna change it later.

Day 12 Dec 18 2025: Today I only worked on sources of error.

Day 13 Jan 5 2026: I only worked on procedure today along with the background colour, which I changed to a nice dark blue.

Day 14 Jan 9 2026: I worked on my question slide today.

Day 15 Jan 14 2026: today I worked on the brita filter slide because I have just done my experiment and now have the results.

Day 16 Jan 19 2026: today I have typed in all of my research into the individual slides.

Day 17 Jan 21 2026: On the 21st I inserted the pictures I took during my experiment and put them in the slideshow for each individual filter.

Day 18 Jan 22 2026: today I continued to insert photos into the slideshow while also creating the boundaries around the pictures and paragraph boundaries.

Day 19 Jan 26 2026: I still am continuing to add pictures and notes to my slideshow.

Day 20 Jan 27 2026: I am starting to transition out of only inserting pictures into the slideshow and over to editing the conclusions, results, and of course the photos.

Day 21 Feb 14 2026: I have started to create the graphs in my slideshow which is a good step to now finishing the slideshow presentation.

Day 22 Feb 18 2026: today I worked on the slideshow research and bibliography.

Day 23 Feb 28 2026: today I have continued to edit my other slides along with making the slides look pleasing. But the most important part that I have done today is the experiment which turned out exactly the way I expected it to.

Day 24 Mar 1 2026: I've started creating my other graphs for the nanoplastics testing and pasting them into my slide

Day 25 Mar 2 2026: I have officially finished my entire slideshow plus experimenting, now all that's left is my trifold.
