

Day 1

Dec 14th  
2025

# Important Info

My project is about emotions  
seeing if different types of music  
genres affect people's emotions using  
the 5 basic emotions: Joy, Anger, disgust,  
sadness and anger

Genres will be Country, Rock, EDM,  
Pop, and Rap

## Schedule

School Science Fair is January  
29th

City Science Fair is April 10th though  
set up is on the 9th

## Ideas

I could make them colour in  
emoji so they don't have to write  
the words

\* they go in the people doing the  
survey

## To-Do

Give out the survey form to  
class

\* before Winter break!

Day 1

Dec 9<sup>th</sup>  
2025

## Continued

### Daily Notes

I have to get parents sign the forms for students

### Description of Project

Research the 5 different types of human emotions

Create a survey of my peers to measure the results

### Anger

to express a dislike of something / showing it with your features

- Sometimes throwing fits not liking something  
wanting to change it usually with force

### Joy

- a feeling of happiness or pleasure
- a state of great happiness
- feeling over joyed

### Sadness

- feeling unhappy not feeling joy
- expressing grief
- losing someone or losing something

- feeling like danger is coming  
- unpleasant feeling usually that something scares you

### Fear

### disgust

- to find something gross
- to loath something that you don't like

# Timetable

First very important step fill out  
the survey sheets this  
weekend

---

## After Winter Break

- Assemble trifold
  - Think about how many survey  
contestants
- 

- Ask the same question over and  
over "What emotion do you feel?"
-

Day 3

Dec  
11th  
2025

# Variables

My manipulated variable:

The genre/type of music played to the people responding to the survey

My responding variable:

The level of the 5 human emotions (disgust, fear, anger, joy, sadness)

My controlled variable:

Play the same songs from the selected genres to people for the same amount of time. Ask the same questions about how they feel when listening to the songs

---

## Daily Notes

- Play songs during science fair and the survey
-

Day 9.

Dec 12th  
2025

I used a dictionary website to write the definitions for the emotions, but I also used my knowledge too.

---

I need to make the Survey forms, and hand them out next week

---

### Why I chose this

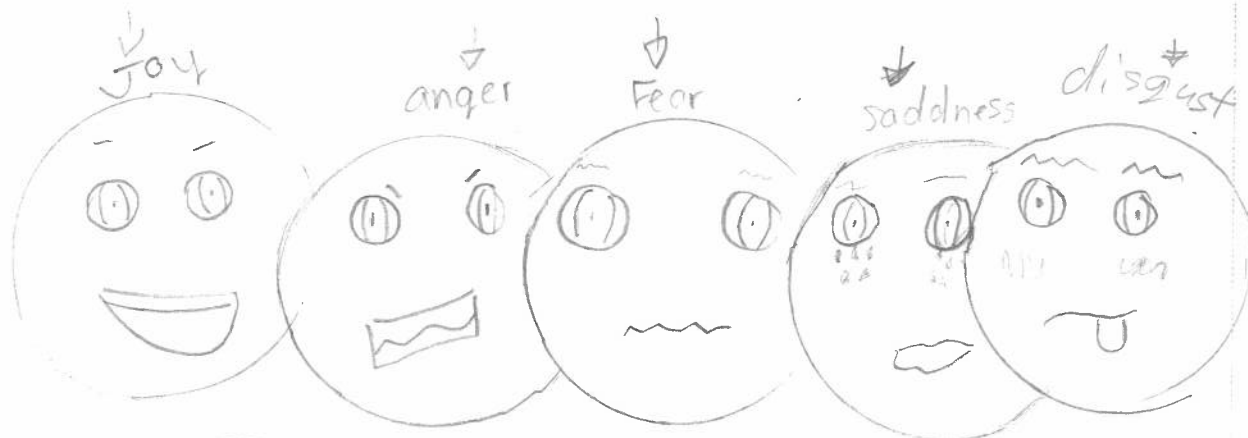

I chose the 5 basic emotion, because I always thought the human mind was interesting especially emotions.

I also love music it calms me down, and makes me feel happy.

---

Day 5

Dec 13th  
2023

These are the faces I imagine I will see  
a lot of

-In this experiment there will obviously be lots of opinions and bias. I'm just super curious if there will be totally different opinions or a somewhat similar result.

-This will also be my first year doing Science Fair so judges and Teachers I am sorry if you get confused.

-Carmen

Day 6

Dec 14th  
2025

I finished filling out the forms!

I plan to do it on the first week of January in school.

I will play 3 songs surveying the people who filled out forms and gave it back!

---

Dec 15th  
2025

Day 7

Again the 5 genres are rock, pop, EDM, country, and rap

-The 5 emotions are joy, sadness, fear, anger, and disgust (I didn't steal the idea from inside out the movie those are the real 5 basic emotions.)

---

Day 8

Dec 16th  
2015

The definition of my term is good.  
and they are from that way to state  
the same definition other than the first notation  
one are mine.

One of my things that I feel I could  
have done is to find a different dictionary  
website that was better. I still used  
it though! 😊

Winter break is in 3 days so I have  
to hard out the terms soon

ASAP!

Have a nice

Christmas!

- Carmen

## Why I chose this:

I chose this because I like emotions. I find them interesting and you are always feeling some sort of emotion even if you don't know the name of it. I also absolutely LOVE music it calms me makes me form ideas it also is better than listening to crickets. I also started getting really in to emotions when my grade 4 teacher Ms. Grasson was away and I got a substitute her name is Ms. B she showed us a video that talked about the brain and psychology I found it super cool!

2 more days till break!

-Carmen

Day 10

Dec 18th  
2025

My favourite in out of the genres is EDM I am going to show you the list of my favourite to least favourite

1. EDM
  2. Pop
  3. Rock
  4. Pop
  5. Country
- 

I will show you my favourite to least favourite emotions.

1. Joy
2. Anger
3. Sadness
4. Disgust
5. Fear

expressing fear brings me shame and joy is like being happy and everybody wants to be happy!

---

Happy Science  
Fair  
-Carmen

Day 1

Dec 1/2/11

## Recommendations

Next time I do science Fair  
I will remind myself to hand out  
the survey sheets (if doing survey) do  
it before Winter Break I missed  
the deadline because of some  
miscommunication between my teachers.  
So I will have to hand the ~~out~~  
as soon as possible on the first week  
of school after breafk. I am also  
going to aplaud my decision for  
deciding to do it myself if I had  
been doing it with a partner so many  
calls it would be a nightmare

Happy Winter  
Break!

-Carmen

Day 12

Dec 28th  
2025

## Making My Survey Paper

- step 1: Find all the songs (clean version)
  - step 2: Make a draft to find out what I really want for survey
  - step 3: Make all the adjustments and create final page
  - step 4: Do survey in front of class
  - step 5: get the papers ASAP and see what they wrote!
- 

Sorry I haven't done  
it in a long time!

- Carmen

Day 13

Dec 29th

2025

my first song is the rock  
one.

Bones by Imagine Dragons  
second song rap song.

It's Tricky by Run - D.M.C

third song pop song

Flowers Need Rain by  
Preston Pablo, Banx & Ranx

My EDM song

Call On Me - Radio edit  
by Eric Prydz

I haven't found country yet  
because honestly I think it sucks.

Day  
14

Dec  
30th  
2025

The question I will ask everytime will be "After listening to this song what is emotion you feel the greatest of?" that way people don't just their favourite emotion because don't wanna hear just joy all the time because I know don't feel joy all the time! An emotion I feel a lot is anger so I could be an saying anger I prefer tell the truth because we don't have only one emotion we have so many and probaly more to discover

---

My B-day is in  
8 days!

- Carmen

Day 15

Dec 31st  
2025

I had to switch the songs to have a wider variety the rap or hip hop song has not been changed.

EDM is deep down by  
Alok, Ella Eyre, Kenny Dope, Never Dull

Country is Dancin' In the Country  
by Tyler Hubbard

Levitating is Pop by  
Dua Lipa

and finally Rock song is  
Cherry Bomb by The Runaways

---

I got the forms  
yesterday also all the songs  
are just under 3 minutes  
or a little over!

- Carmen

Day 16

Jan 3rd  
2026!!

When doing the presentation I am going to define the 5 emotions to make things simpler example: anger is showing a major dislike for something and expressing it through actions. Then when people are listening there will be 5 emojis on the page with there names under it. Volenteers will circle what they feel the most out of the 5. example: I circled disgust when I listened to the country song. I will be asking for some help to make the survey paper but that is just because I don't really understand computers. Final ~~note~~ note happy new year!

P.S my Birthday is in 3 days!

---

Let's do this  
Science Fair!

Day 11

Jan 14<sup>or 12</sup> 2020

Project title: Do different genres of music affect the 5 basic emotions?

Tri-fold layout  
Data: I will do graphs of what happened with the survey results

Day 17

Continued

Survey happens on Tuesday both classes only people who filled out form do it.

I have the trifold it is white and is recommended size.

We got materials for the esablinq from staples so thank you staples!

In trifold I will explain the emotions on paper like the survey papers.

flappy

Science  
Fair!

-Carmen

Day 18

Jan 13th  
2026

I did the survey 15 people did it!

One of my Hypothesis is that people will be choosing joy the most since all the songs were upbeat and happy.

I think country will be the one were they are the most disgusted.

I think EDM or Pop will have the most joy.

I don't know what emotion the hip hop song will be maybe happiness?

The Rock song will probably provoke many emotions such as happiness, anger, disgust, and that's all because why would someone be sad? Why would you feel fear?

Carmen

Day 18

# Continued

Yes, Music does effect emotions one moment your happy, the next your weeping on the floor. I chose 5 songs that were happy, and I started realising it as people commented it during the survey. My parents ashered me that was good because if I had a sad country song, and a angry, hard rock song that would show bias right?

Country would cause disgust because less people like it, and young kids don't really find it intresting.

Pop and EDM has shown big intrest to people in the past years so happiness.

I chose Flo Rida for my Hip Hop song so it's chill, and kind of Poppy, but come on! It's hard to find non-swearng songs.

Rock will bring a mix emotions, but mostly happiness because the song is Thunder and Thuder talks about showing people you can do it better.

Day 19

Jan 16  
2026

# Results

What they were feeling at the start:

Anger 1 1

Happiness ||| ||| ||| ||| ||| 13

Song 4  
11 happy  
2 disgusted  
1 sad

Song 5  
11 happy  
2 disgusted  
1 sad

After survey  
12 happy  
1 disgusted  
1 sad

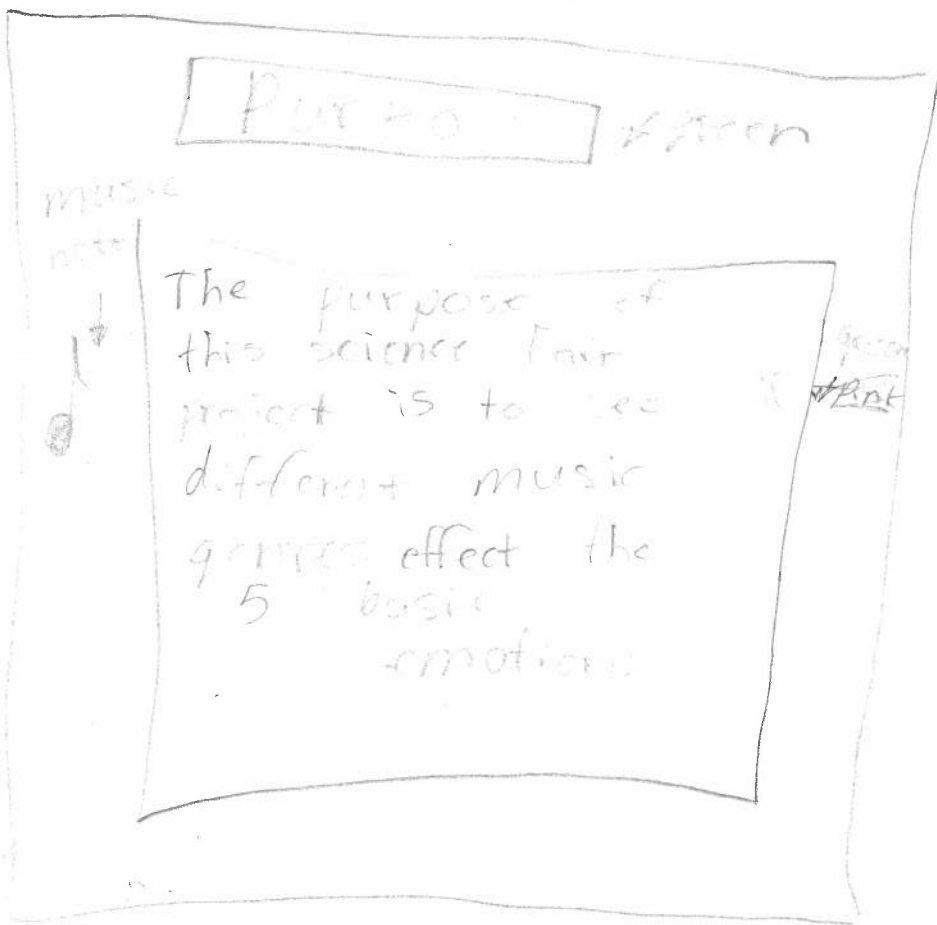

Day

Purpose

Jan 18th  
2026

I am going to do the box first

The Purpose of this science fair project is to see if different music genres affect the 5 basic emotions

Day 22

Jan 22nd  
2026

## Conclusion

This was an adventure, and one I loved.

Genres of music do affect people's emotions they may be small but drastic changes, but these emotions changed inside people when listening to these songs.

~~Hope you enjoyed listening to my project.~~

## Conclusion

Genres of music do affect people's emotions though switching from each genres there was minimal changes.

~~If I was to make another project or at least change mine a bit, I would get more people to do it and do it sooner. I would do all the interviews of people who filled out the survey. I would also get permission for the class.~~

Day 2<sup>3</sup>

Jan 24<sup>th</sup>

2026

# Conclusion

My hypothesis that Country would be the most disgusted is false as it has the same disgust as Pop.

My theory that EDM and Pop will be the most loved ~~to~~<sup>was</sup> wrong and right EDM did in fact have the most happiness. Pop on the other hand did not.

I was right about Rock as it got a mixed group of emotion but mostly happiness as predicted.

Hip Hop was partly wrong, partly right it got the same results as Rock it did not get lots of disgusts.

~~final conclusion~~  
Final Conclusion

The different genres of music did not significantly affect changes in people's emotions. Overall after listening to all the genres people mostly felt happiness. This is important because if your friend is feeling a negative emotion you know which music genre to <sup>have</sup> make them feel.

Day 22

# Science Fair Feedback

- Increase Background research  
~~AAAA~~ Action Plan: Do more online research about Dr. Paul Ekman, and his theory on the five basic emotions  
~~IA~~ Are there other articles on the effect of music and emotions?
- <sup>A</sup> - References listed in logbook  
Action Plan: Put References in McGraw's forms
- Increase sources of error variables  
Action Plan: ~~ADD~~ include additional ~~real~~ reliability errors ~~ADD~~  
Respondent Errors: People may respond differently based on their mood/emotions before and during the experiment  
Environment: Busy classroom mixed ~~participating~~ participating kids  
Adults: Doing it at home
- Outliers: why more kids were happy before survey  
Action Plan: Add more info to results and conclusion # who knows how kids think 😊

Day 22

More trials: including ~~MA~~ Adults  
Action Plan. Update and email  
the summary + playlist to Adults.  
Compare results of kids and  
Adults.

Update new graph: Include new results

~~#~~  
Expand on Conclusions: Include new  
results from Adults. Talk about  
future applications of our  
research.

# Adults in Survey to

- 2 - Nana & Grumpy
- 3 - Aunty M & Caity
- 4 - Mom & Dad
- 7 - Matt & Karen ✓
- 8 - Timo & Chris (with M Nana and Grumpy)
- 11 - Jay & Lisa ✓
- 12 - Kyle & Lindsay ✓
- 14 - Devin
- Carrie + Eddie ✓

I am including 14 Adults because that there was 14 kids/students in survey to make it equal

Day 23

## Adult Hip Hop

Country will probably get disgust and anger or the occasional Happiness since these adults that I did don't really like Country.

Pop will probably get just happiness. I can't think of a scenario where they get something different.

EDM is for sure getting happiness everybody I know loves it! No doubt!

Rock will get mixed because well everybody has a different opinion. For sure no fear, and sadness I'll tell you that.

Hip Hop will get happiness because most of those people have the same taste as my Mom and Dad.

# Kids Vs Adults Hypothesis

## Kids

Kids have less of an ~~own~~ opinion and they're probably like "Ohhh! Music I love it! Happy, happy, happy" but it still is interesting to see what their ~~thoughts~~ <sup>feelings</sup> when they listen to these songs.

id = More happy

## Adults

~~Adults~~ Adults have more of an opinion they also have been listening to music longer so they know what genre or type of music they like. I predict a less changes for kids more changes for adults.

Because Adults <sup>have</sup> more Adults = more str. ~~more~~ <sup>negative</sup>

~~update: There will be more Adults than kids~~

Made it  
to City  
Science  
Fair!

Day 24

# Adult Conclusion

~~For Country I was correct, because the emotions that were shown was exactly what I predicted. I predicted anger, happiness, and disgust.~~

~~For EDM I was super wrong. Some people liked it less than Country! EDM got less happiness than predicted, but then again people have their own opinion. I was right with Hip Hop it only got happiness! No hate for Hip Hop whatsoever.~~

For Country I was correct, because the emotions that were shown was exactly what I predicted.

For EDM I was super wrong <sup>some</sup> people liked it less than Country! ~~EDM got~~

Pop got less happiness than predicted, but then again people have their own opinion.

I was right with Hip Hop it only got happiness! No hate for Hip Hop whatsoever.

I was <sup>right</sup> that there wouldn't be any sadness or fear. However there was 1 disgust.

11 Day 20

## Future Research

- More people to survey, and more genres / songs to listen to.
- Gather group of people experiencing negative emotions and make them listen to music  
(interviews / in person interviews)
- Do different types of research to learn way more about what music makes people feel!

- Say this my name is  
Carmen

# Presentation

I chose this topic because I love music and find emotions interesting

-So I surveyed my class showing them 5 songs each song a different genre of music Rock, Pop, Hip Hop, EDM, and Country and I asked them to write the emotion they felt out of the most out of the 5. The emotions I used were happiness, anger, sadness, Disgust and Fear

# INFORMED CONSENT FORM 2C

CALGARY YOUTH SCIENCE FAIR

You are invited to take part in a research study. Before you decide to be a part of this study, you need to understand the risks and benefits. This consent form provides information about the research. If you agree to participate in this research, you will be asked to sign this consent form before taking part. This process is known as *Informed Consent*.

Student Researcher (1): Carmen Fair School: Hawkwood Elem School Phone: 403-777-6410	Student Researcher (2): School: School Phone:
Project Title: The effects of music genres on the 5 basic human emotions	
Science Fair Coordinator (Adult Supervisor): Name: Ms Swinton Phone: 403-777-6410	
Project Description: My project is about seeing if different types of music genres change peoples emotions. The 5 emotions are joy, sadness, anger, fear and disgust. I will survey the people in my class and see their reactions to what was heard. No bad language will be played from any of the songs.	
Your benefits from participating: Learning about how music makes you feel.	
Your risks from participating: No risks.	
Your time commitment: 30 minutes to listen to the songs and fill out my survey.	
The confidentiality of your data: The results of this research will be given with all information about individual participants removed. No personal information will be stored on a computer. All information on paper that could be used to identify individuals will be shredded at the end of the research project.	
Withdrawal: Your participation is voluntary, and you have the right to withdraw at any time for any reason. If you wish to do so, please talk to the Science Fair Coordinator/Adult Supervisor.	
Review: This project has been reviewed by the Ethics Committee of the Calgary Youth Science Fair Society and has received permission to proceed.

Science Fair Coordinator (Adult Supervisor): Name: Ms Swinton Phone: 403-777-6410

Project Description:  
My project is about seeing if different types of music genres change peoples emotions. The 5 emotions are joy, sadness, anger, fear and disgust. I will survey the people in my class and see their reactions to what was heard. No bad language will be played from any of the songs.

Your benefits from participating: Learning about how music makes you feel.

Your risks from participating: No risks.

Your time commitment: 30 minutes to listen to the songs and fill out my survey.

The confidentiality of your data:  
The results of this research will be given with all information about individual participants removed. No personal information will be stored on a computer. All information on paper that could be used to identify individuals will be shredded at the end of the research project.

Withdrawal:  
Your participation is voluntary, and you have the right to withdraw at any time for any reason. If you wish to do so, please talk to the Science Fair Coordinator/Adult Supervisor.

Review:  
This project has been reviewed by the Ethics Committee of the Calgary Youth Science Fair Society and has received permission to proceed.

Feedback:  
The results of this research will be provided to you in the public presentation of the Science Fair Project.

By signing below, you are agreeing to participate in this study.

Name Jan Craig (please print)

Signature [Signature] Date SEP 14 2015

**If this participant is under the age of 18, permission of a parent or guardian is also required:**

I give permission for the person named above to participate in this study.
