

## Log book:Aegis Ironclad Structure(2026)

January 10: We started brainstorming and came up with the idea of doing a structure inspired by the beetle.

January 11:We started searching and reading articles to find information then wrote it all down.

January 11:We filled out the form and continued the research.

January 12:We did more research and started this log book.

January 14:We continue to research to find stronger information.We then drew designs on possible models.

January 18:We started making the model.

January 19:Continued making the model and continued with research.

January 20: We conducted research on this day.

January 21:We continued searching for more stronger information.

January 23:We did more research and worked on filling in the information boxes for CYSF.

January 26:Worked on the log book and found pictures that would fit the project.

January 27:Finish adding touch ups to the model for our project.

January 28: Write down our hypothesis and fails during the process of making a model.

January 31: Polished the writing part of the project.

February 1: We took pictures and filmed a video to fill in for the CYSF. After we designed our poster.
