

# Logbook

Date:11/14/2025

We started to brainstorm about our project and we came to a conclusion on the valves of the heart we soon called it The Pumping Problem

Date:1/21/2025

We started to make the slide show, and we picked out our template. We also used canva not google slideshow.

Date:11/27/2025

We had some technical difficulties with the cysf login for the project. We also did some research about our project

Date:12/5/2025

We worked on our project by getting help from our teacher and the layout. We also wrote the functions of veins, arteries, and capillaries.

---

Date:12/11/2025

We only added a bit more detail to our slides.

Date:12/12/2025

Me Abdulazeez worked on the pulmonary and systemic circulation definition and I also put the foundation for our slides in the future and I added more info about the parts I worked on like Vains and half of the arteries.

Date:12/16/2025

Me, Hamza worked on almost everything(changed most of the pictures) and also added blood types, circulation. I will add more info later on, but right now they're looking very well made.

Date:1/8/2025

Abdulazeez added the summery reflection and the causes also the treatments

Date:1/17/2025

Abdulazeez and Hamza looked for parts for our model online and we tried to buy the items but the shipping was too long and expensive so we looked for better options.

Date:1/24/2025

Abdulazeez went to stores and pharmacies to find all the things and Abdulazeez found and bought the styrofoam, tubes, syringes, and liquid detergent

---

Date:2/4/2025

Abdulazeez finished his part of the slides. And hamza finished the model before our presentation tomorrow
