

# Logbook

*A data sheet of when we did work*

December 2, 2024 - Looked at the projects from last year and chose our project, an RC Car.

January 15, 2025 - Got the supplies to start coding and finished the keyboard detection part of the code

February 2, 2025 - Switched from Thonny to Visual Studio Code and finished the code that turns on and off an LED

February 28, 2025 - Got the motor drivers, motors, and breadboards and started re-programming the code to control motor drivers

March 2, 2025 - Finished coding, but received several errors such as unallocated GPIO Pins.

March 9, 2025 - Finished all code, with no noticeable errors.

March 10, 2025 - Finished 3D printing the frame, and finished the tri-fold.
