

January 6: worked on what is oil, different types of oil, and facts about oil

January 8: more detail about oils

January 12: components of crude oils

January 13: ways we can separate water from oil, the ways oils can react to sea water and how it can go into the environment

January 16: We added the procedure to cleaning up an oil spill

January 26: We added more ways to clean up oil spills and worked on the tri-fold

February 7: We worked on experimenting with the method to do the experiment and also worked on research

February 28: We finished experimenting and completed our fill-in

March 1: We completed our tri-fold and slides
