I wonder if I can  
save heat energy from  
stoves and ovens.

My question, how can we  
save ~~heat~~ energy from  
heat sources

①  $\text{EMF}$   
→ sound - like a microphone  
→ heat - like a oven  
→ magnetic-like motors  
→ potential - ball on stairs

materials: ~~ther~~

thermo electric plate - amazon

cake tin - walmart

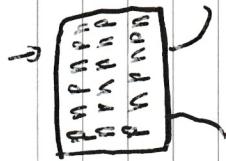

metal - amazon

fan blade - amazon

wire - amazon

thermal glue - amazon

Thermoelectric plate

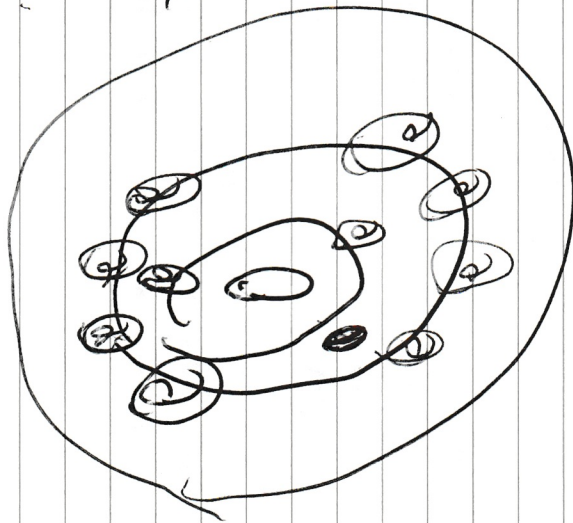

bismuth telluride

dope selenium

dope Antimony

bi - bismuth  
Te - telluride  
Se - selenium  
?? Sb - antimony

why  
Sb and  
NO + AN.

heat
