Colours and Emotions

Look at the colour for a few seconds and then choose what emotion you feel when you see the colour.

Thank you for helping me with my science experiment! - Rebecca

* Indicates required question

1. How old are you?*

Mark only one oval.

- 0-5
- 6-12
- 13-18
- 19+

2. What is your first and last name?*

BLUE

4. Yellow - What emotion does this colour make you feel?*

Mark only one oval.

- Joy
- Warmth
- Energetic
- Happy
- Anxious
- Other _____

GREEN

5. Green - What emotion does this colour make you feel?*

Mark only one oval.

- Content
- Jealous
- Tense
- Proud
- Lethargic
- Other _____

3. Blue - What emotion does this colour make you feel?*

Mark only one oval.

- Relief
- Calm
- Sad
- Safe
- Fear
- Other _____

YELLOW

PURPLE

6. Purple - What emotion does this colour make you feel?*

Mark only one oval.

- Pleasure
- Angry
- Motivated
- Irritated
- Peaceful
- Other _____

Dec 21st, 2023

Problem

Can colour affect emotion?

Experiment

I will send multiple people a multiple choice form asking what emotions people feel when they see certain colours.

What is Colour Psychology?

Colour psychology is the study of how different colours affect human mood and behavior. It studies how colours can influence emotional responses, as well as how responses to colour are impacted by age and culture.

Dec, 21st, 2023

Hypothesis

I think that if everyone feels the same way about one colour, then people will know what colours to use to evoke certain emotions, because everyone will have similar responses when they see a certain colour.

Unit 1: Introduction

The first part of the course will focus on the history and development of the subject.

Key concepts and theories will be explored in detail.

Students will be encouraged to engage in critical thinking and analysis.

The course will provide a solid foundation for further study.

Assessments will be designed to evaluate understanding and application.

Support resources and materials are available for students.

Regular communication and feedback are essential for success.

Students should actively participate in class discussions.

The course aims to foster a deep understanding of the subject matter.

For more information, please contact the course coordinator.

- = Osmo kids science experiment ideas

- = opposite emotion to the Very Well Mind study reference

- = very well mind study - = Emotions I thought of

Jan 21, 2023 - = Emotions similar to the study and reference off the colour wheel of emotions.

Blue: Relief, Calm, Sadness, Safety, fear

Yellow: Joy, watith, Energetic, Happy, Anxious

Green: Contentment, jealous, Tellat, proud, Lonley

Purple: Pleasure, Angry, Motivated, Irritable, peaceful

Pink: love, kind, Cheerful, Rage, grief

Red: love, afraid, confused, worried, excited

orange: joy, nervous, enthusiastic, amazed, cautious

Black: Sadness, grief, happy, Dissapointed, afraid

White: Relief, calm, Free, grateful, despair

Brown: Brave, hopeful, Disgust, Strong, energetic

Hypothesis

- Writing
- What do I think the outcome will be?

Research

- What sites did I use?
- What is Colour Psychology?
- Other little facts abouts colour and emotion that I found.

Variables

- My Independent Variables
- My Dependent Variables
- My Controlled Variables

Procedure

- How I did the Project
- I used a google form and sent it to people
- I gathered the data using graphs.

Observations

- What most people said about each colour was...
- People chose more positive emotions depending on what their favourite colours are.

Results

- Show results on graphs or diagrams

P=People

Observations

Colour	Most Common	Least Common
Blue	Calm (27P)	Fear (0P)
Yellow	Energetic (21P)	Joy and warmth (5P) (5P)
Green	Content (26P)	Lonely (3P)
Purple	Pleasure (13P)	Angry (1P)
Pink	Cheerful (20P)	Grief (1P)
Red	Excited (15P)	Confused and afraid (3P) (3P)
Orange	Cautious (14P)	Amazed (4P)
Black	Disappointed (12P)	Happy (4P)
White	Free (19P)	Despair and Relief (3P) (3P)
Brown	Disgust (23P)	Energetic (1P)

Color Psychology: Does It Affect How You Feel? How Colors Impact Moods, Feelings, and Behaviors

By Kendra Cherry, MSEd | Updated on November 29, 2022

✓ Medically reviewed by Steven Gans, MD

Do you feel anxious in a yellow room? Does the color blue make you feel calm and relaxed? Artists and interior designers have long believed that color can dramatically affect moods, feelings, and emotions. "Colors, like features, follow the changes of the emotions," the artist Pablo Picasso once remarked.

Color is a powerful communication tool and can be used to signal action, influence mood, and even influence physiological reactions. Certain colors have been associated with physiological changes, including increased blood pressure, increased metabolism, and eyestrain.

This article discusses what color psychology means and how colors affect the mind and body. It also explores research on the effect of color and the psychological reactions people may experience.

Press Play to Learn More About How Colors Affect the Mind and Body

Hosted by therapist Amy Morin, LCSW, this episode of The Verywell Mind Podcast shares how colors influence the mind and body. Click below to listen now.

What Is Color Psychology?

Blue - What emotion does this colour make you feel?

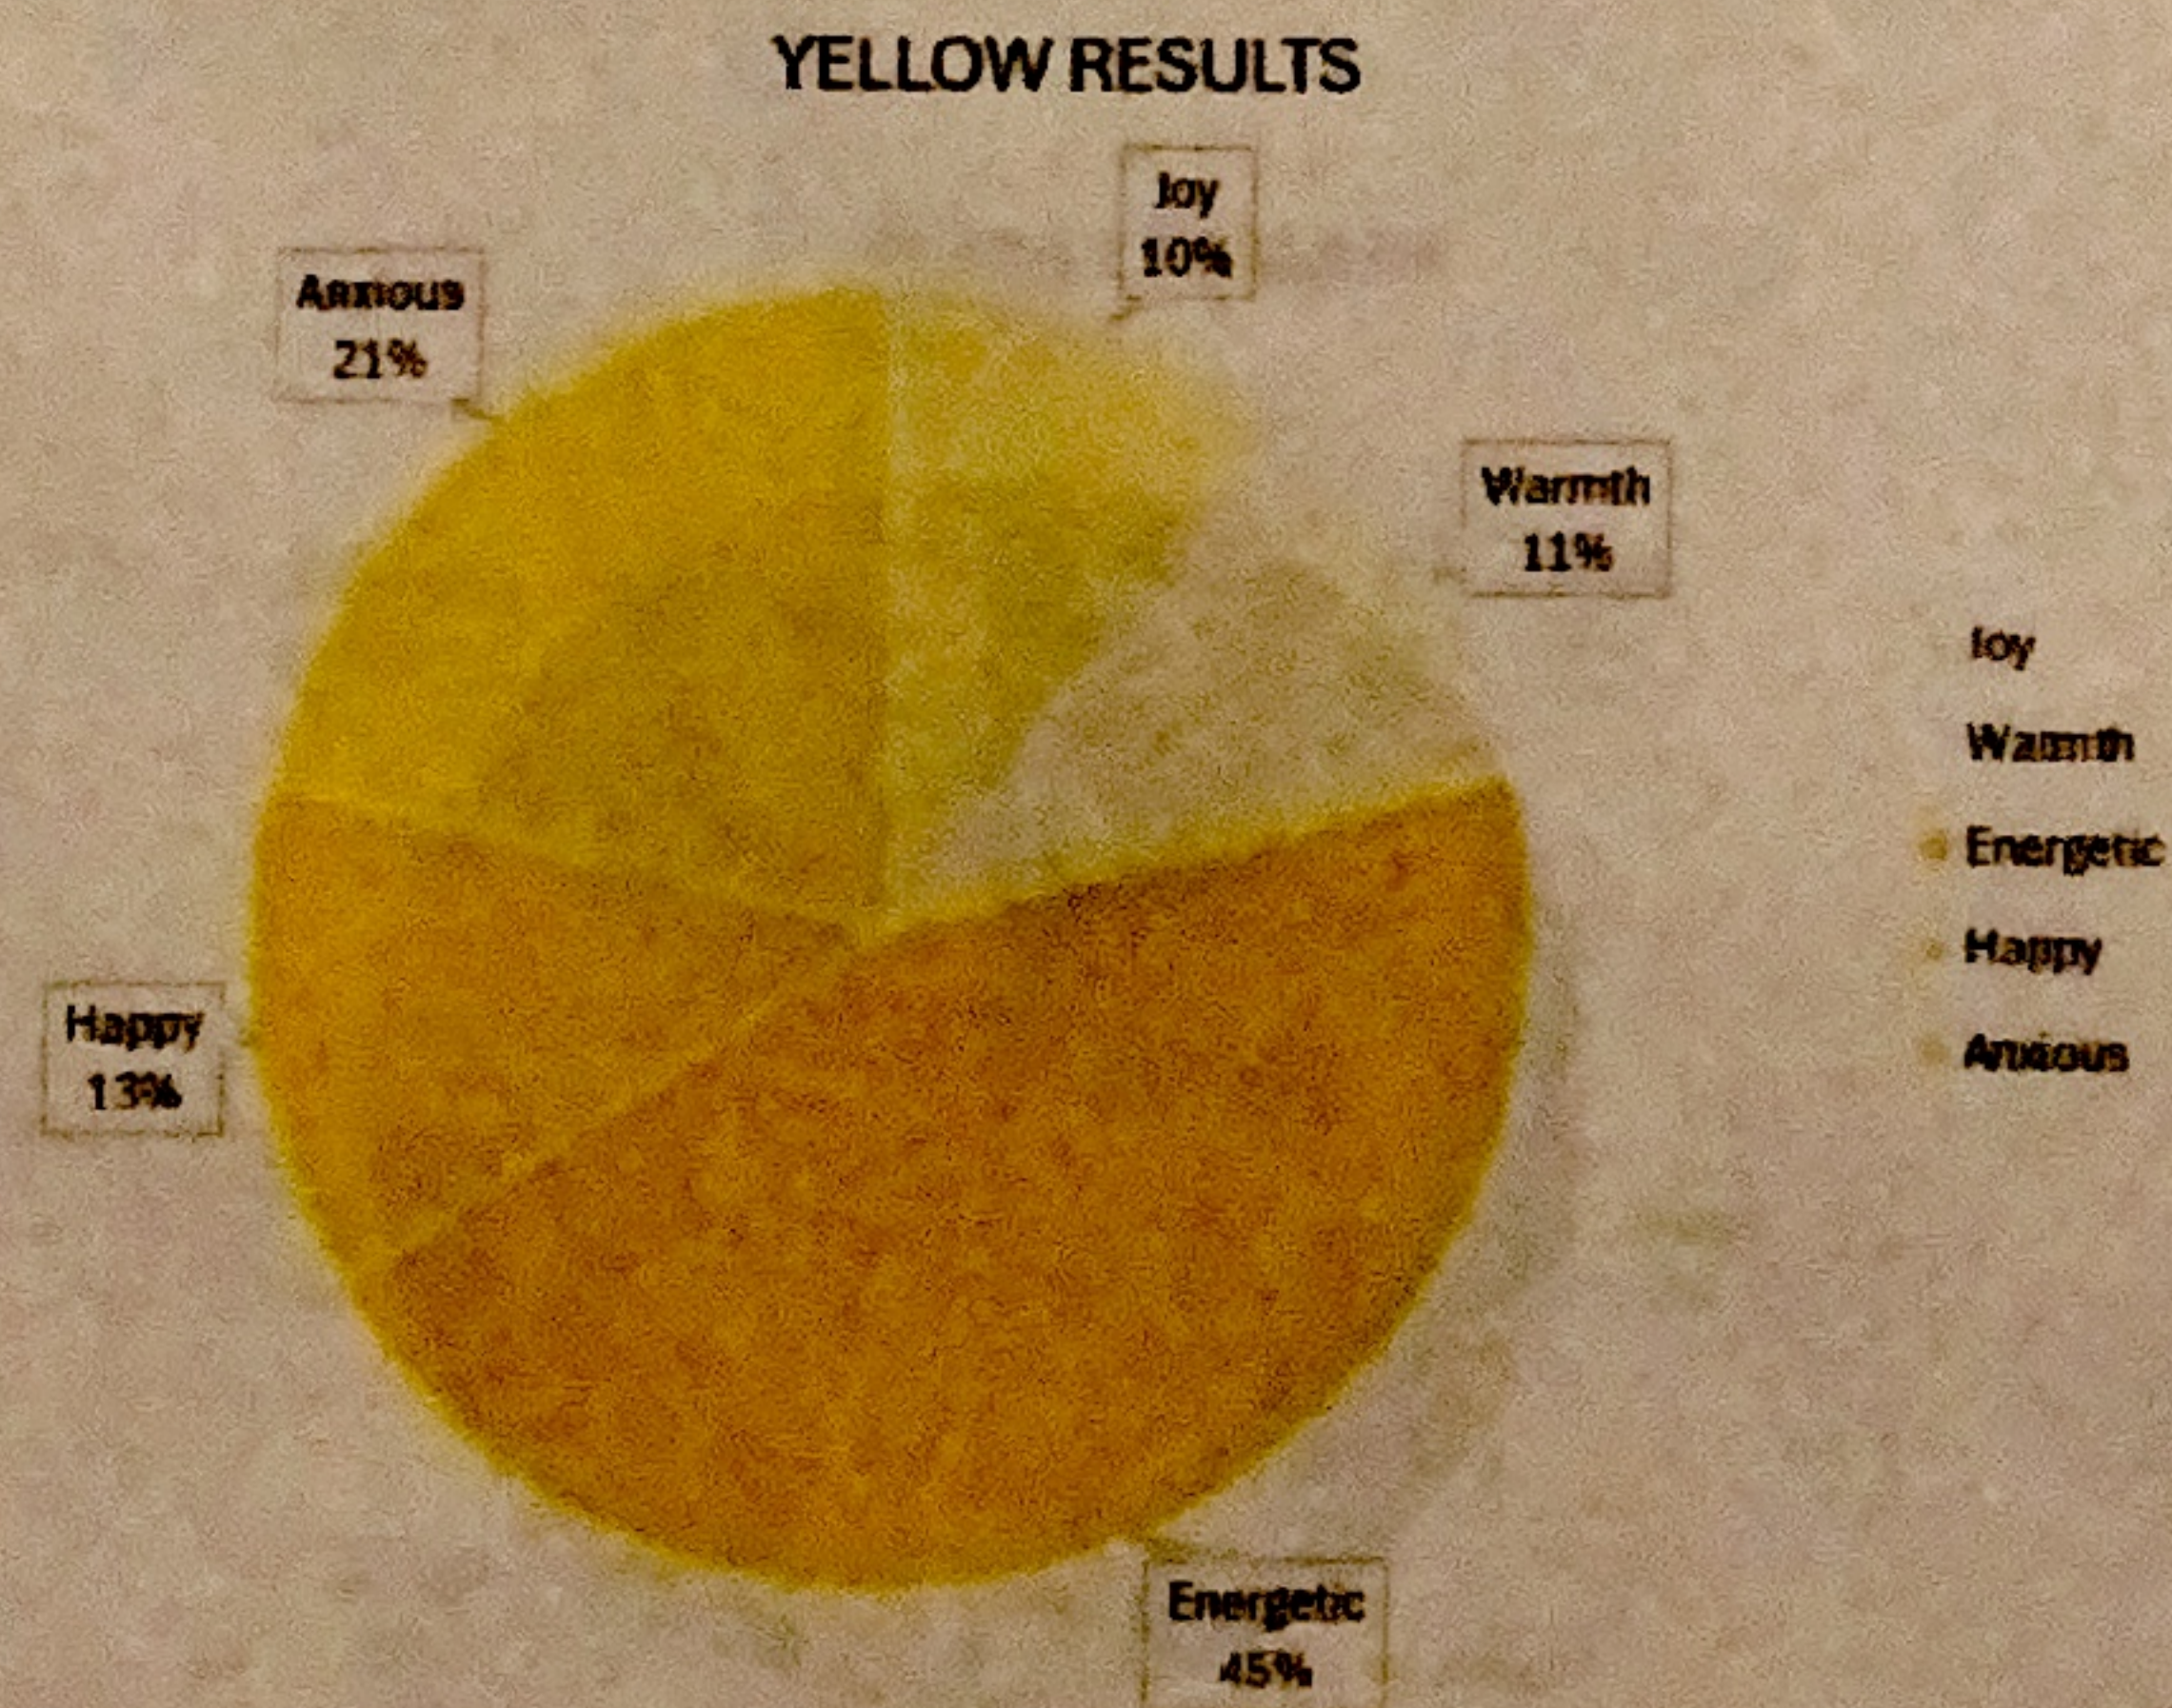

47 responses

74.4% of people surveyed said they felt emotions of relief, calm and safety (which are similar emotions)

Yellow - What emotion does this colour make you feel?

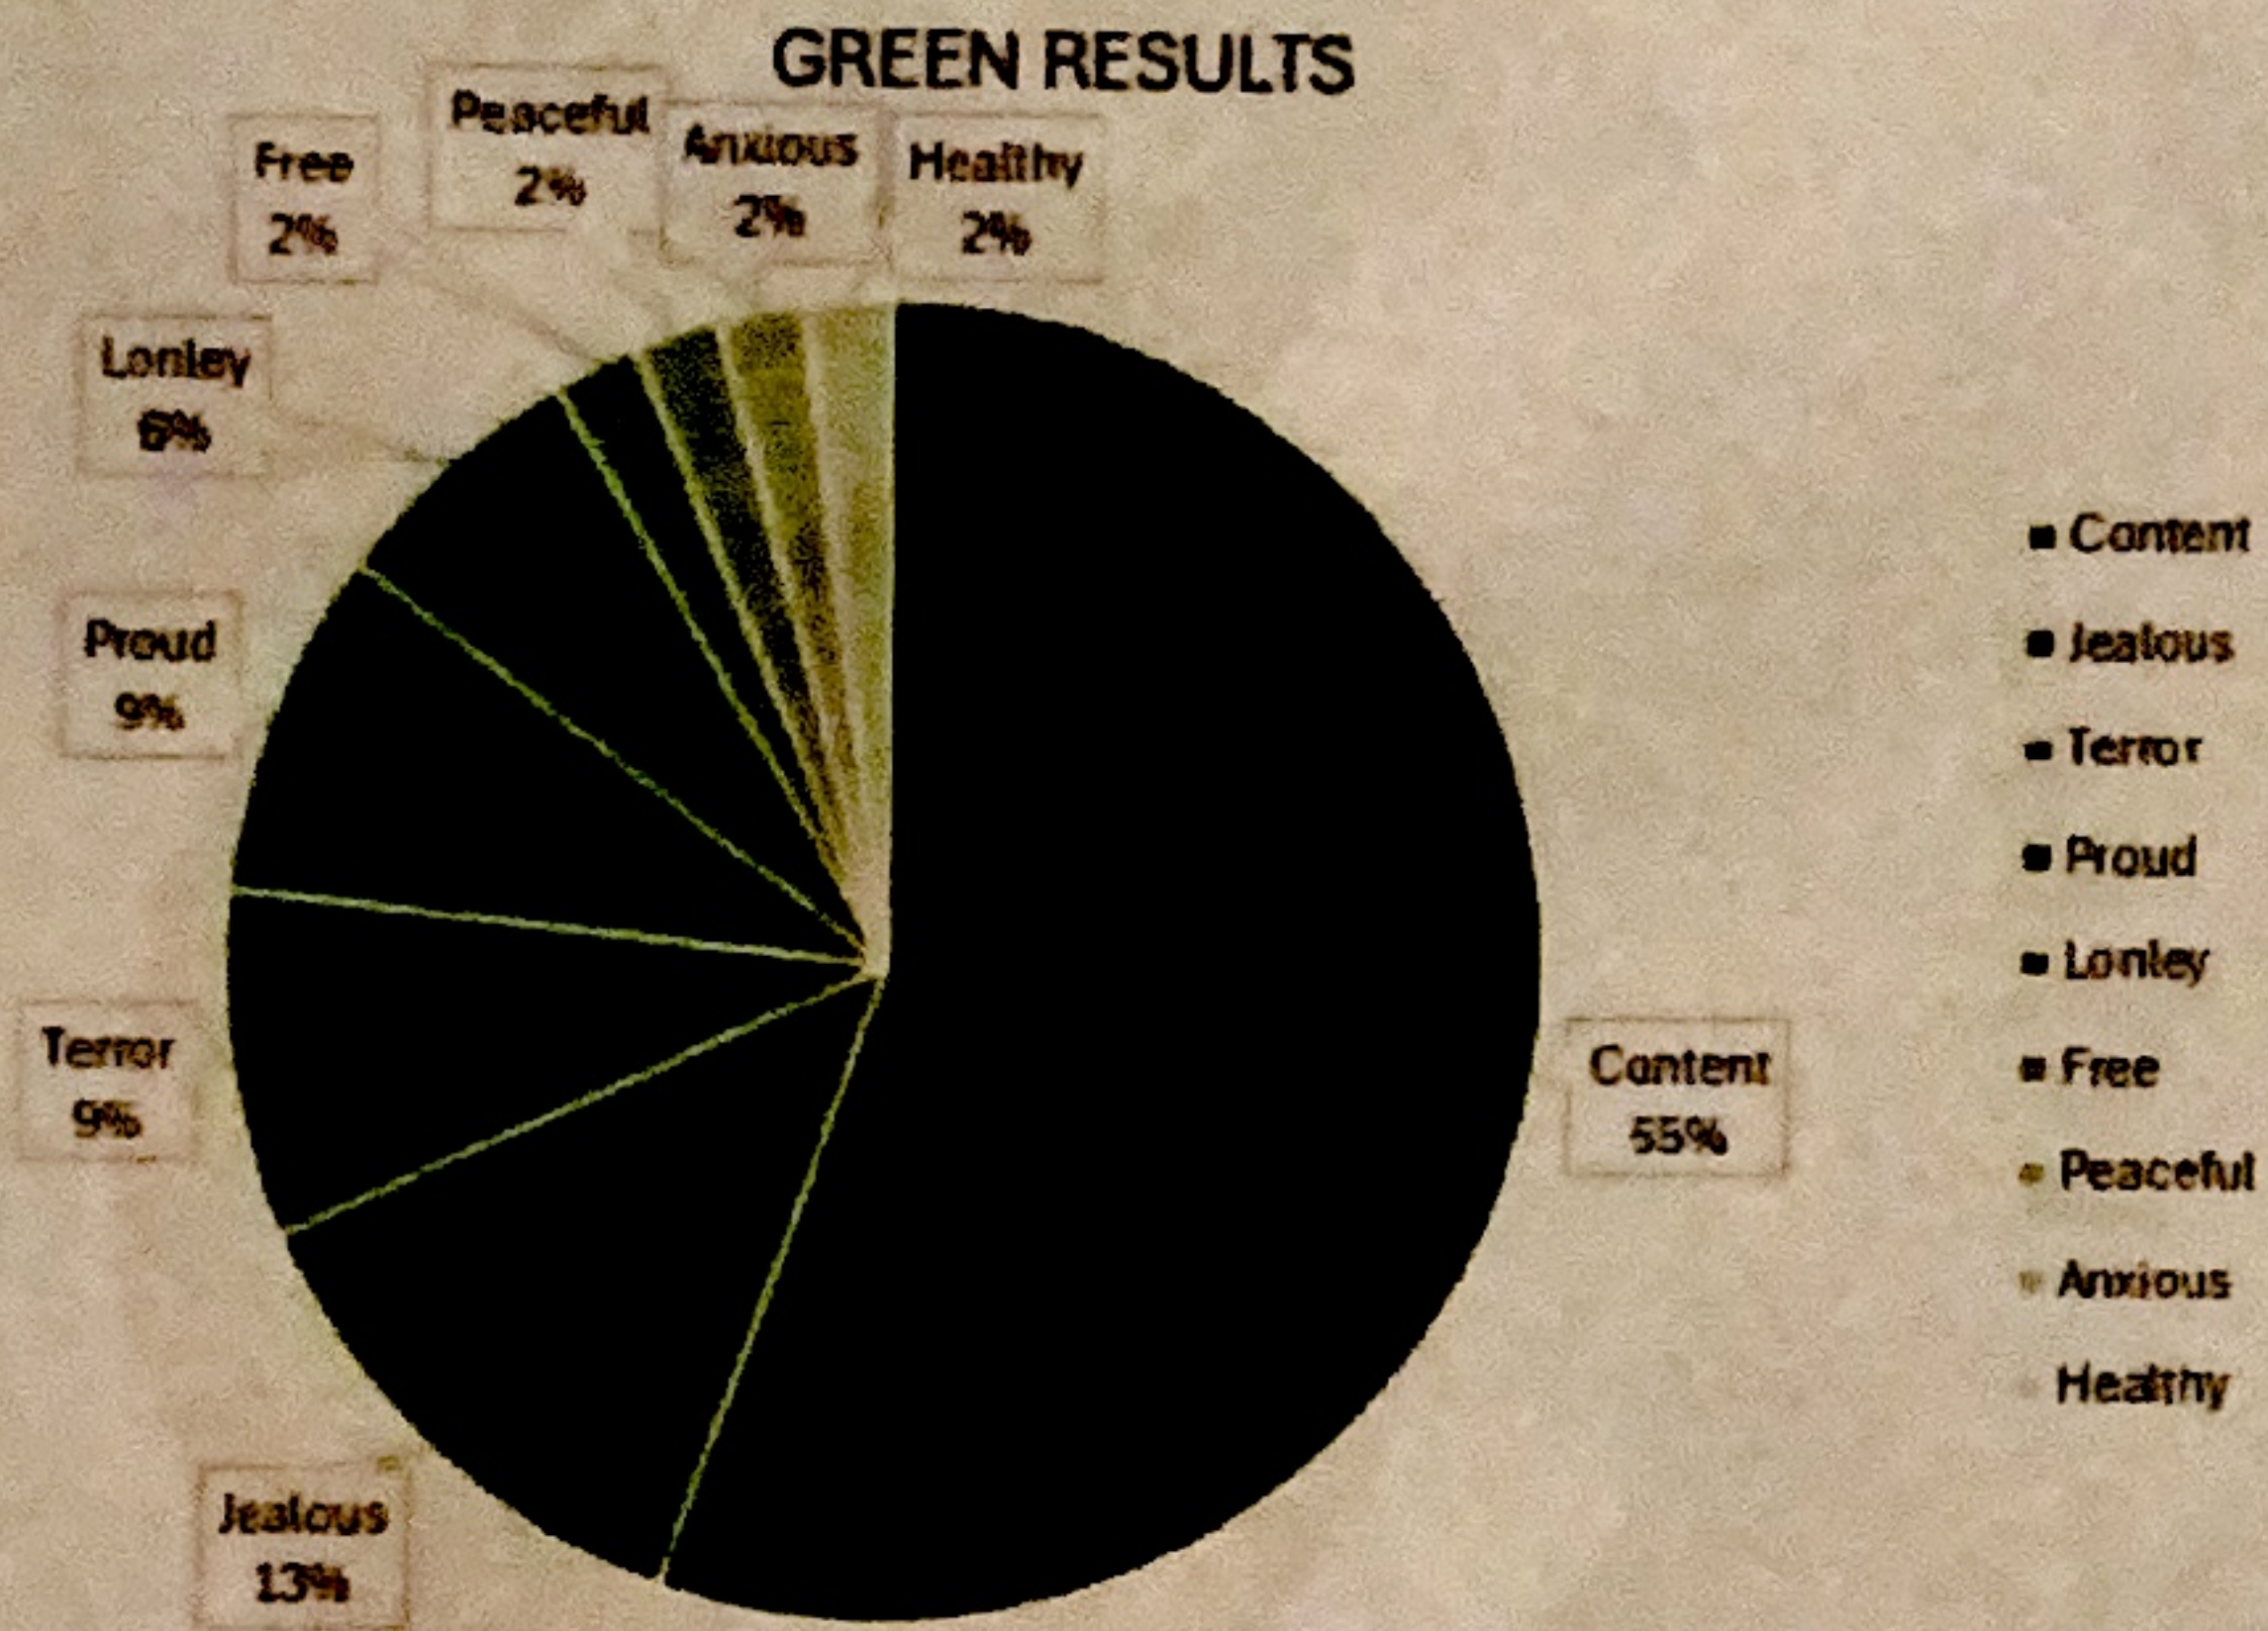

47 responses

34% of people surveyed said they felt emotions of joy, warmth and happiness (which are similar emotions)

Green - What emotion does this colour make you feel?

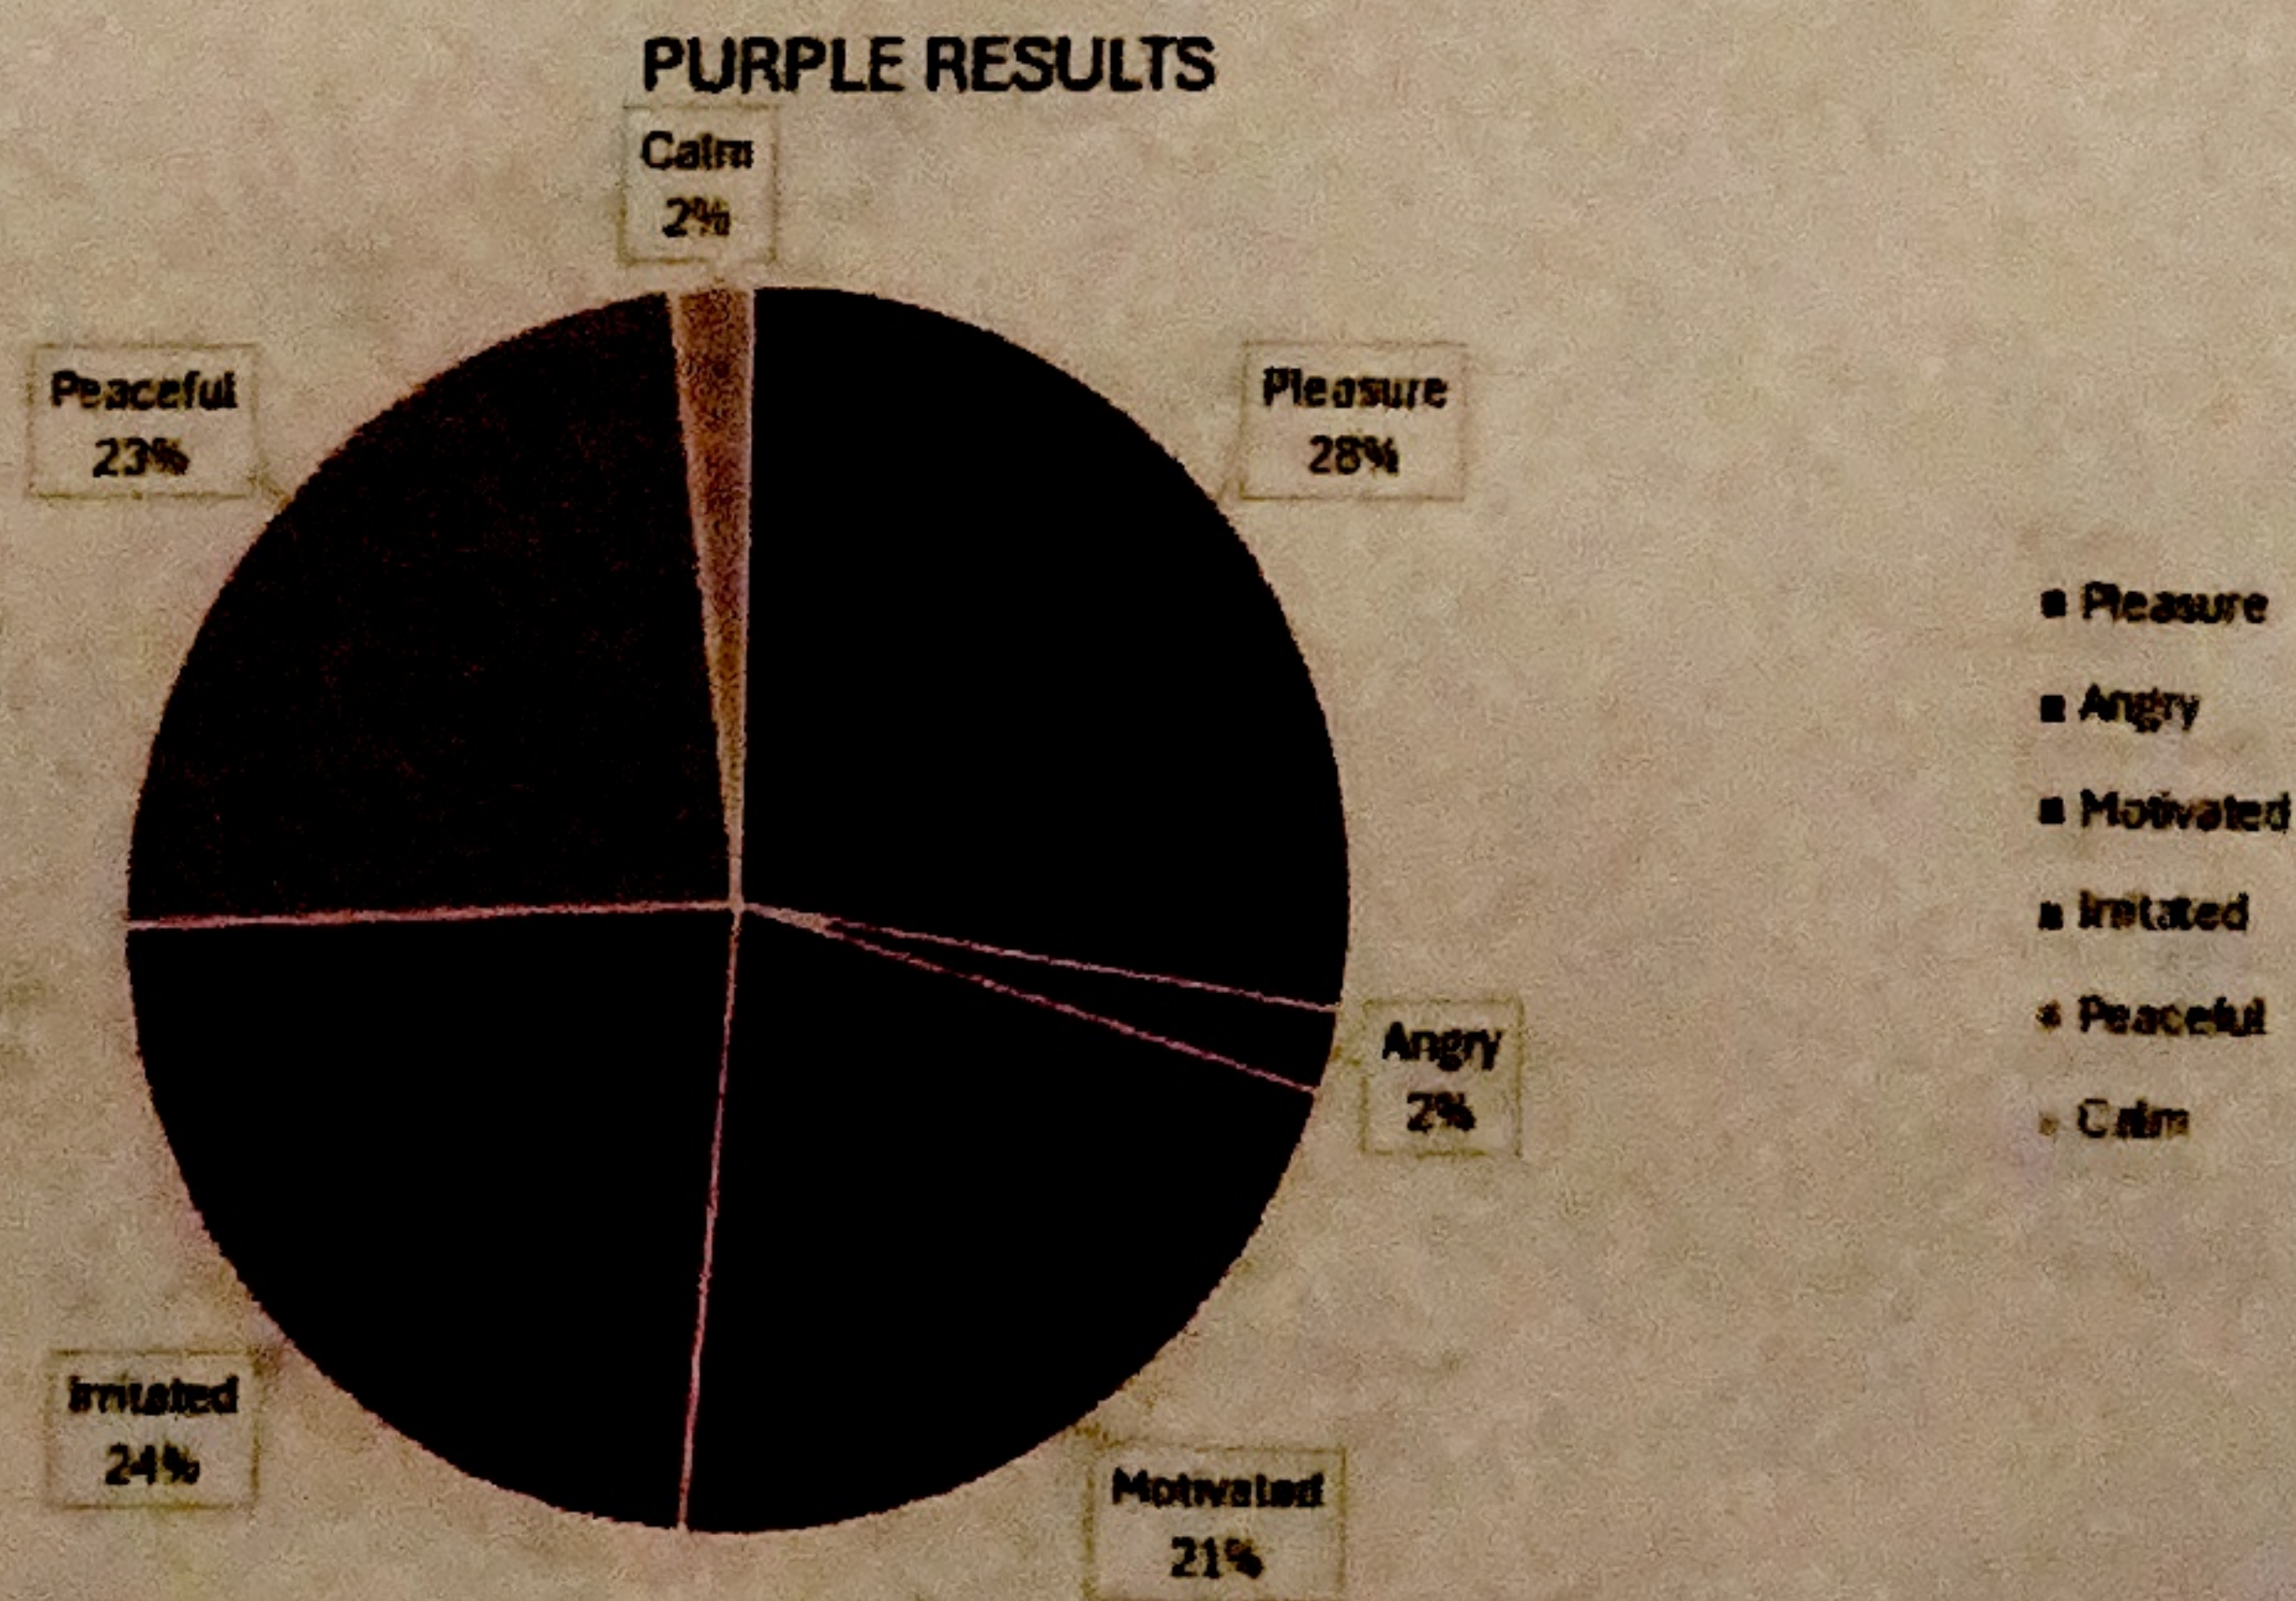

47 responses

59.5% of people surveyed said they felt emotions of contentment, peacefulness and freedom (which are similar emotions)

Purple - What emotion does this colour make you feel?

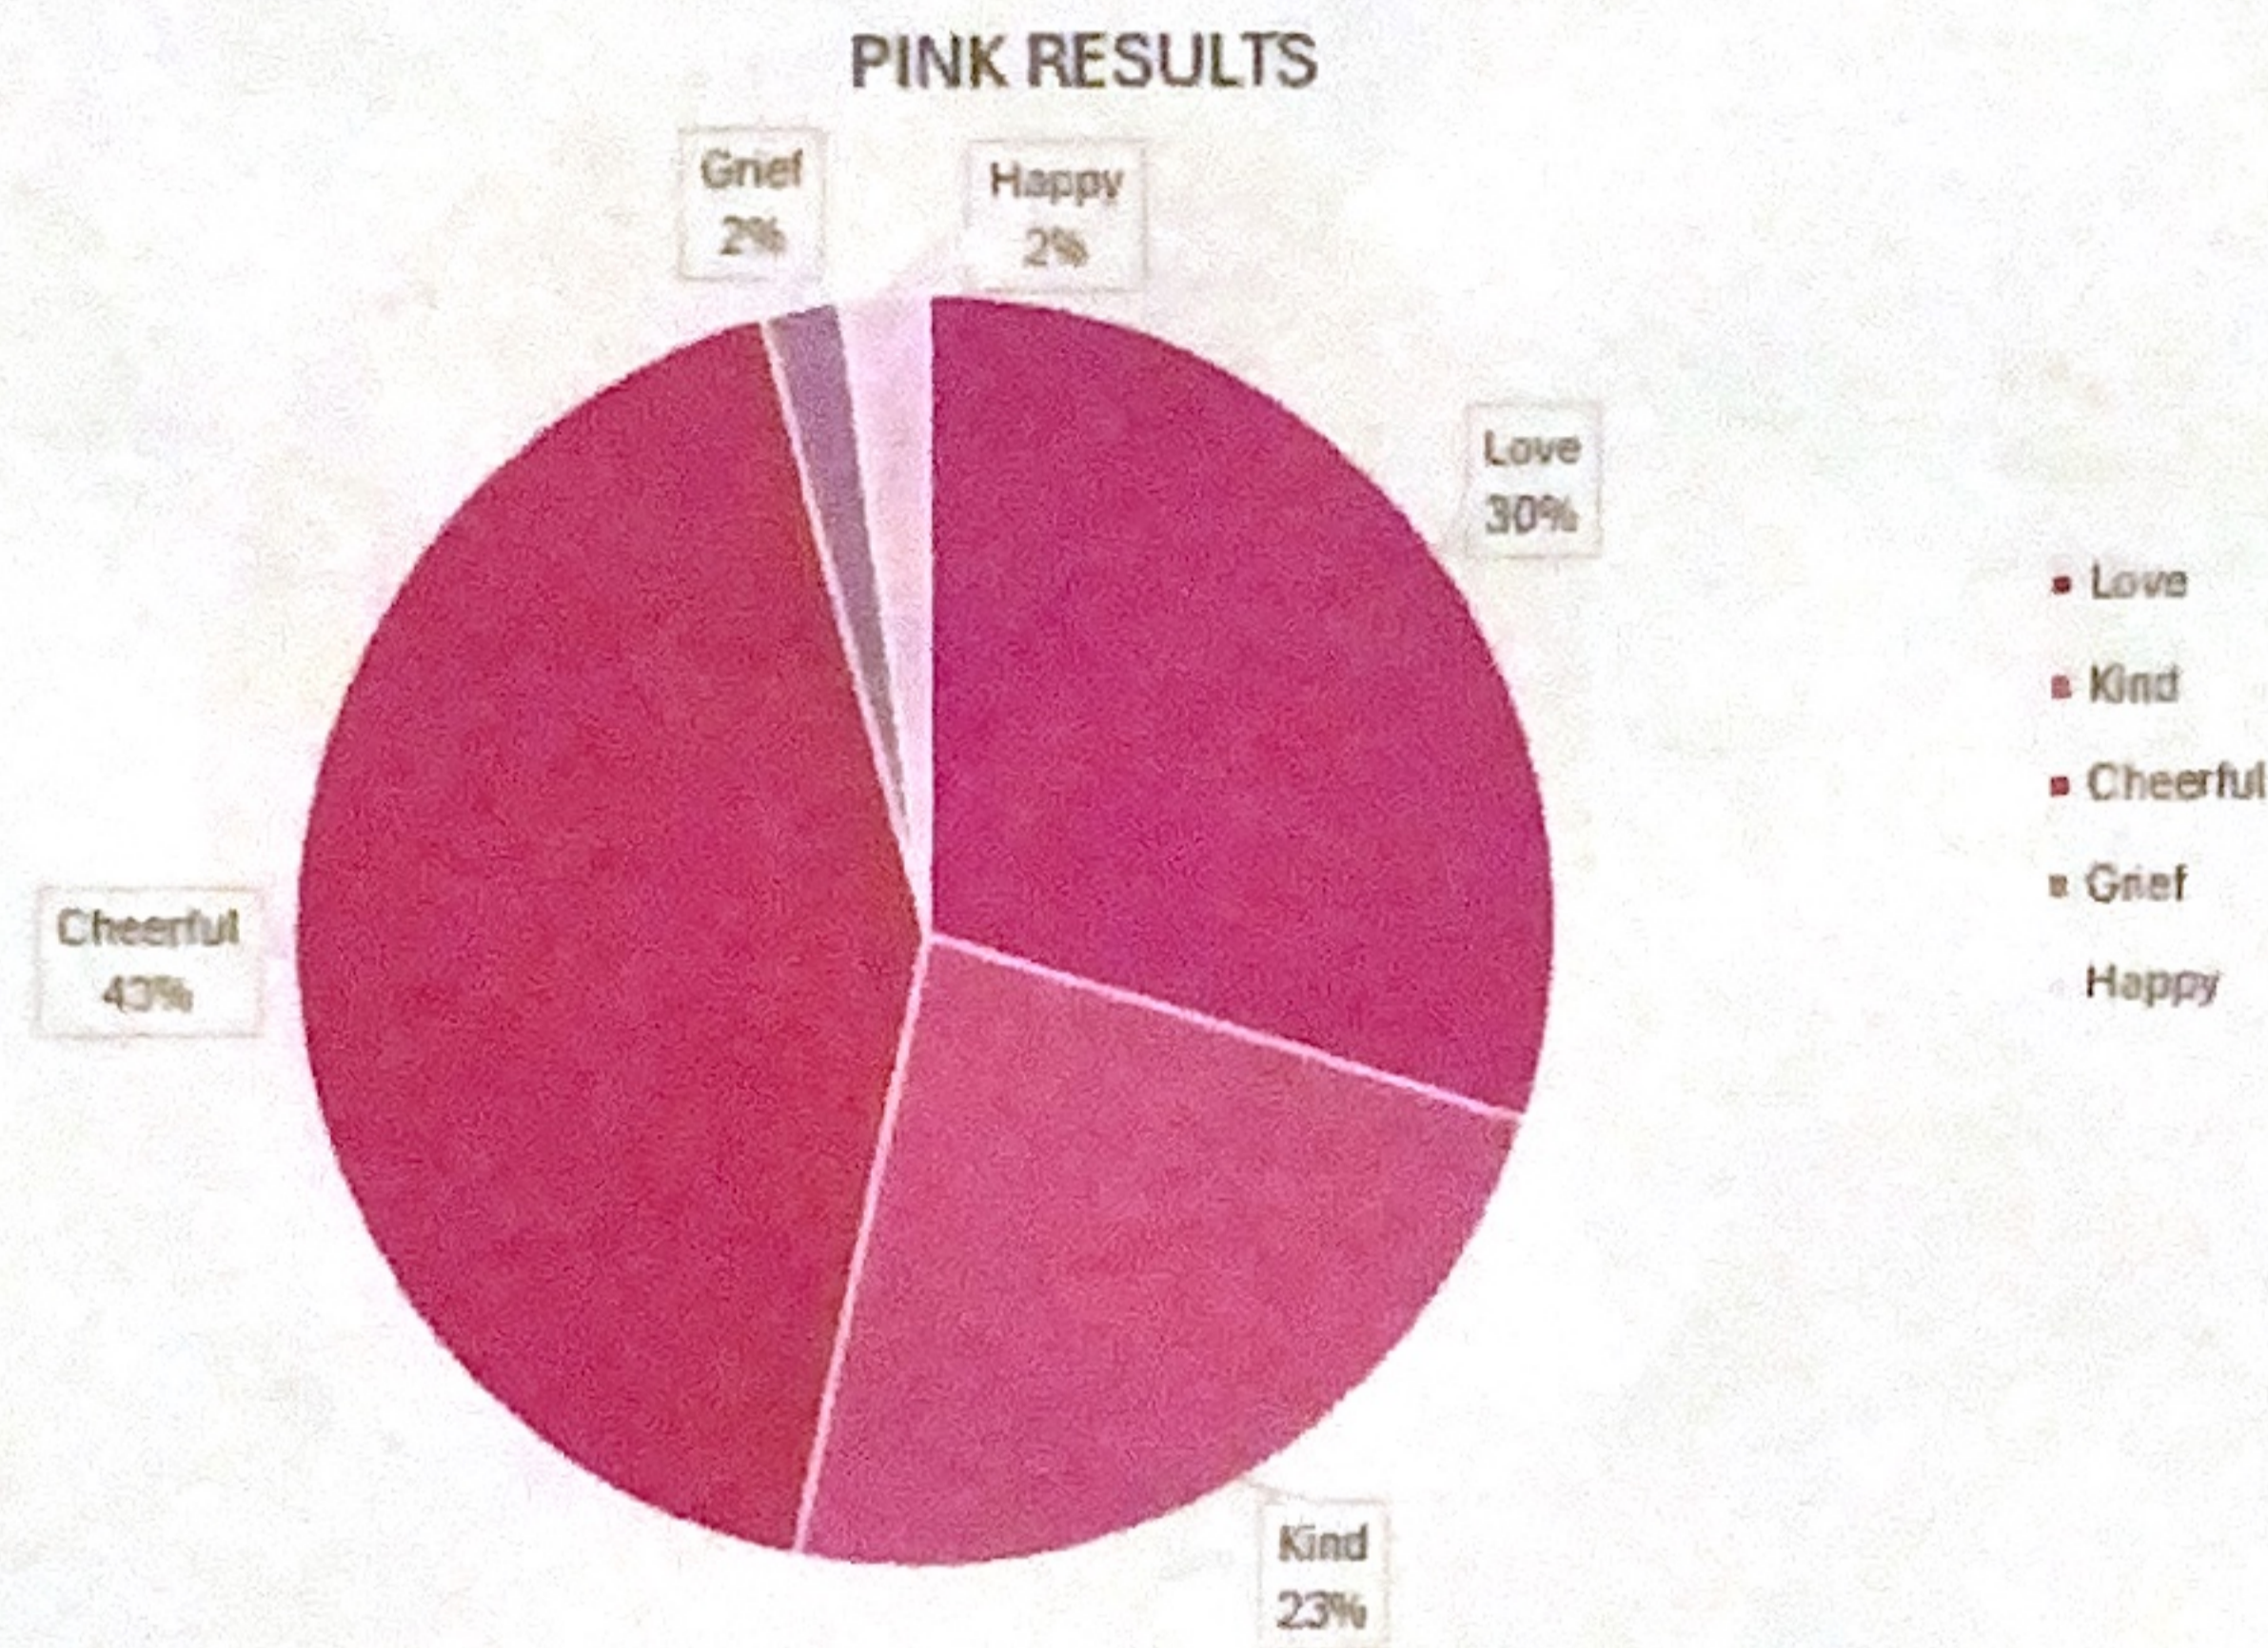

47 responses

74.5% of people surveyed said they felt a positive emotion (pleasure, motivated, peaceful, calm)

Pink - What emotion does this colour make you feel?

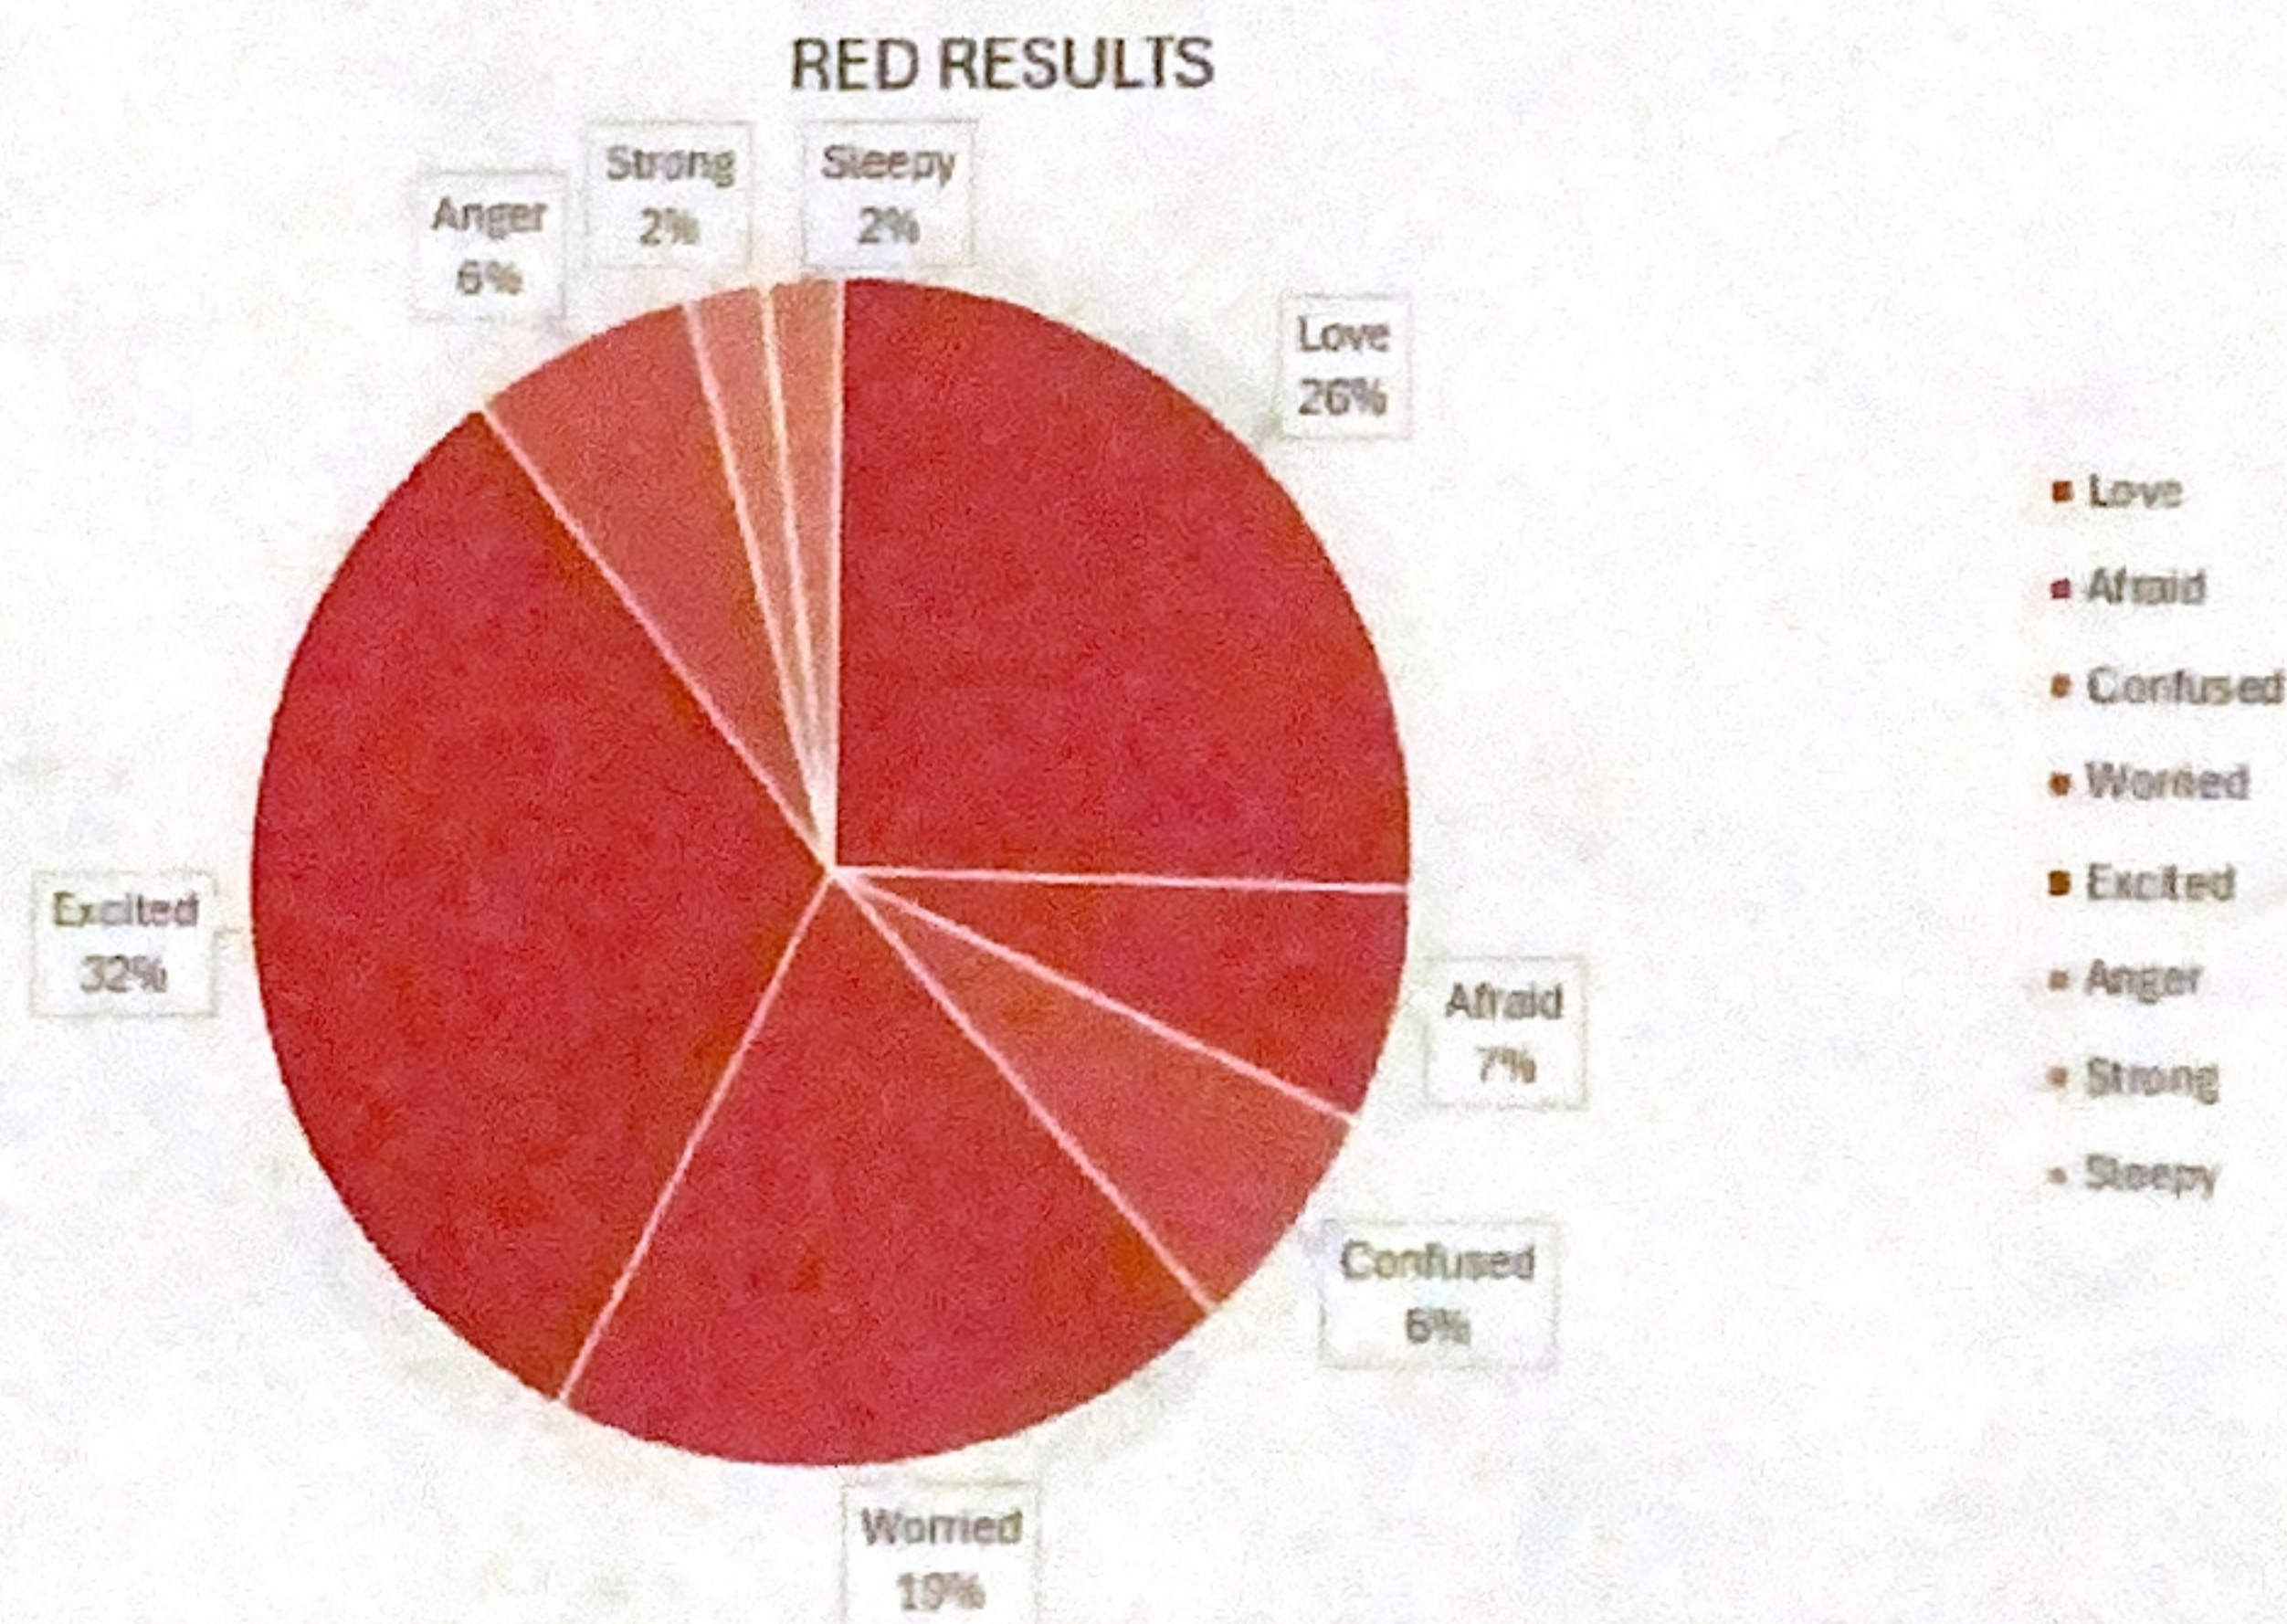

47 responses

Nearly 100% of people feel positive emotions when seeing the colour pink

Red - What emotion does this colour make you feel?

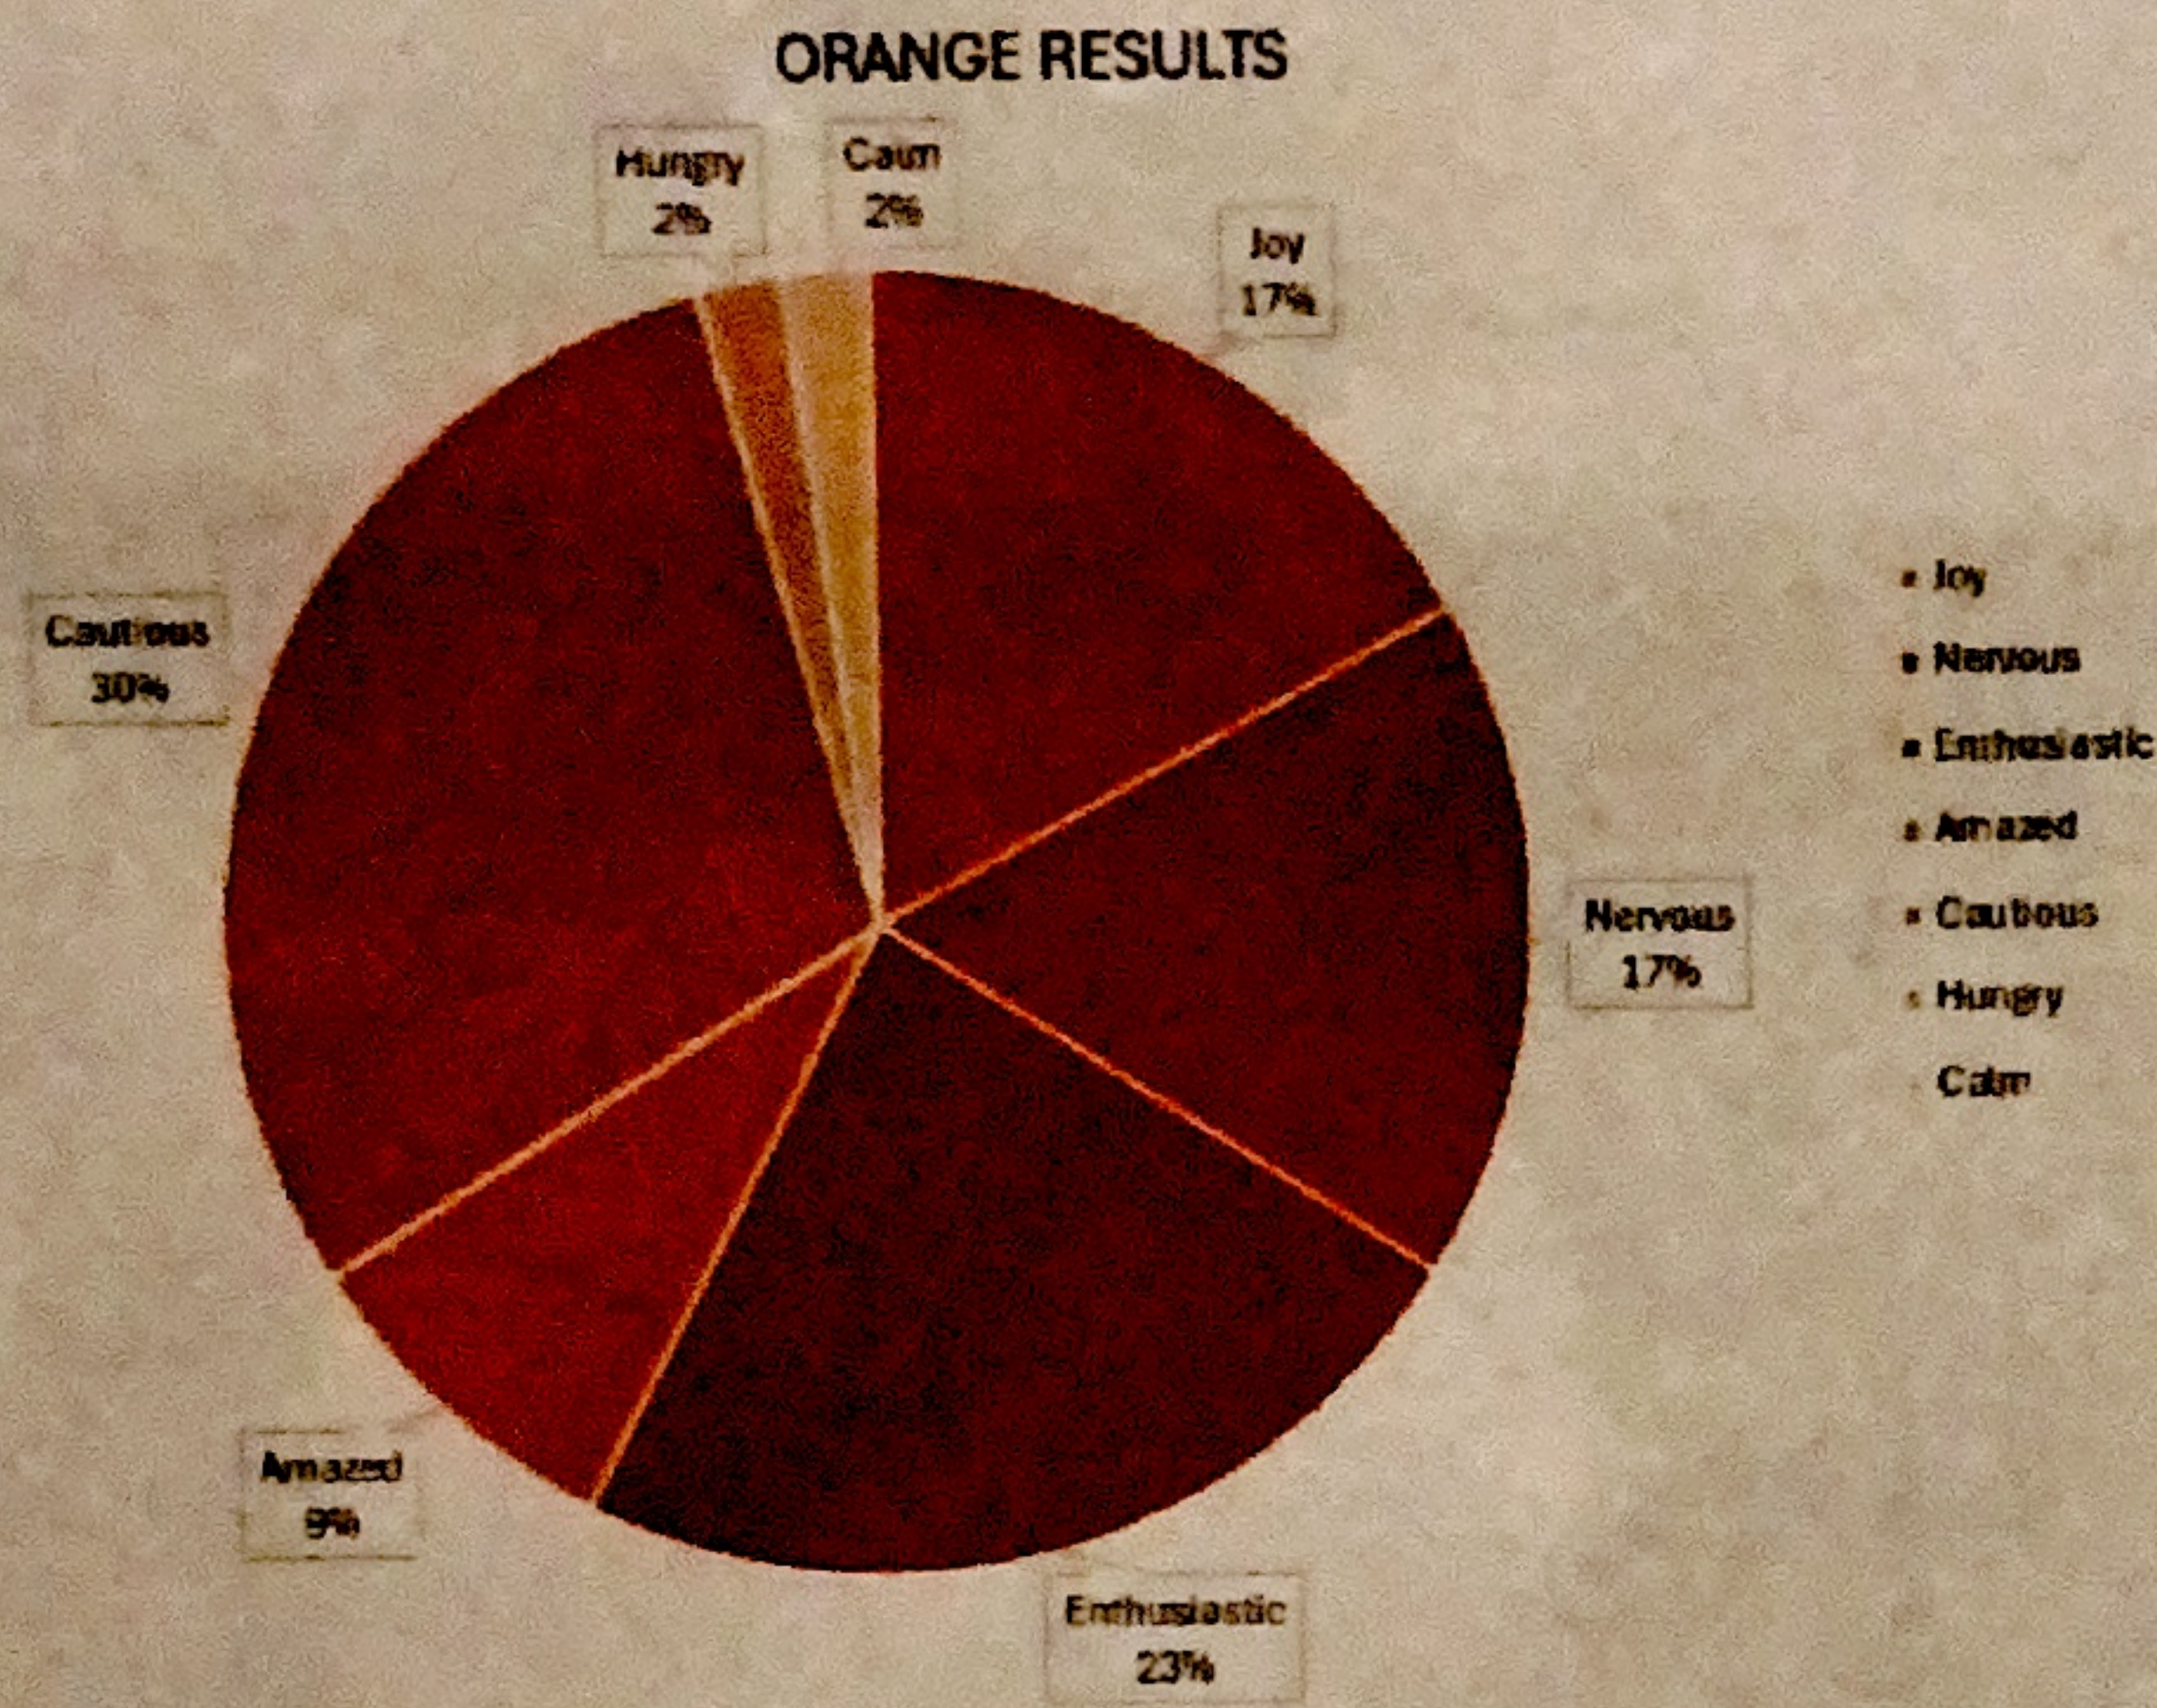

47 responses

57.4% of people feel red is a loving and excited colour while 38.3% of people feel red is a negative colour (anger, worried, confused, afraid)

Orange - What emotion does this colour make you feel?

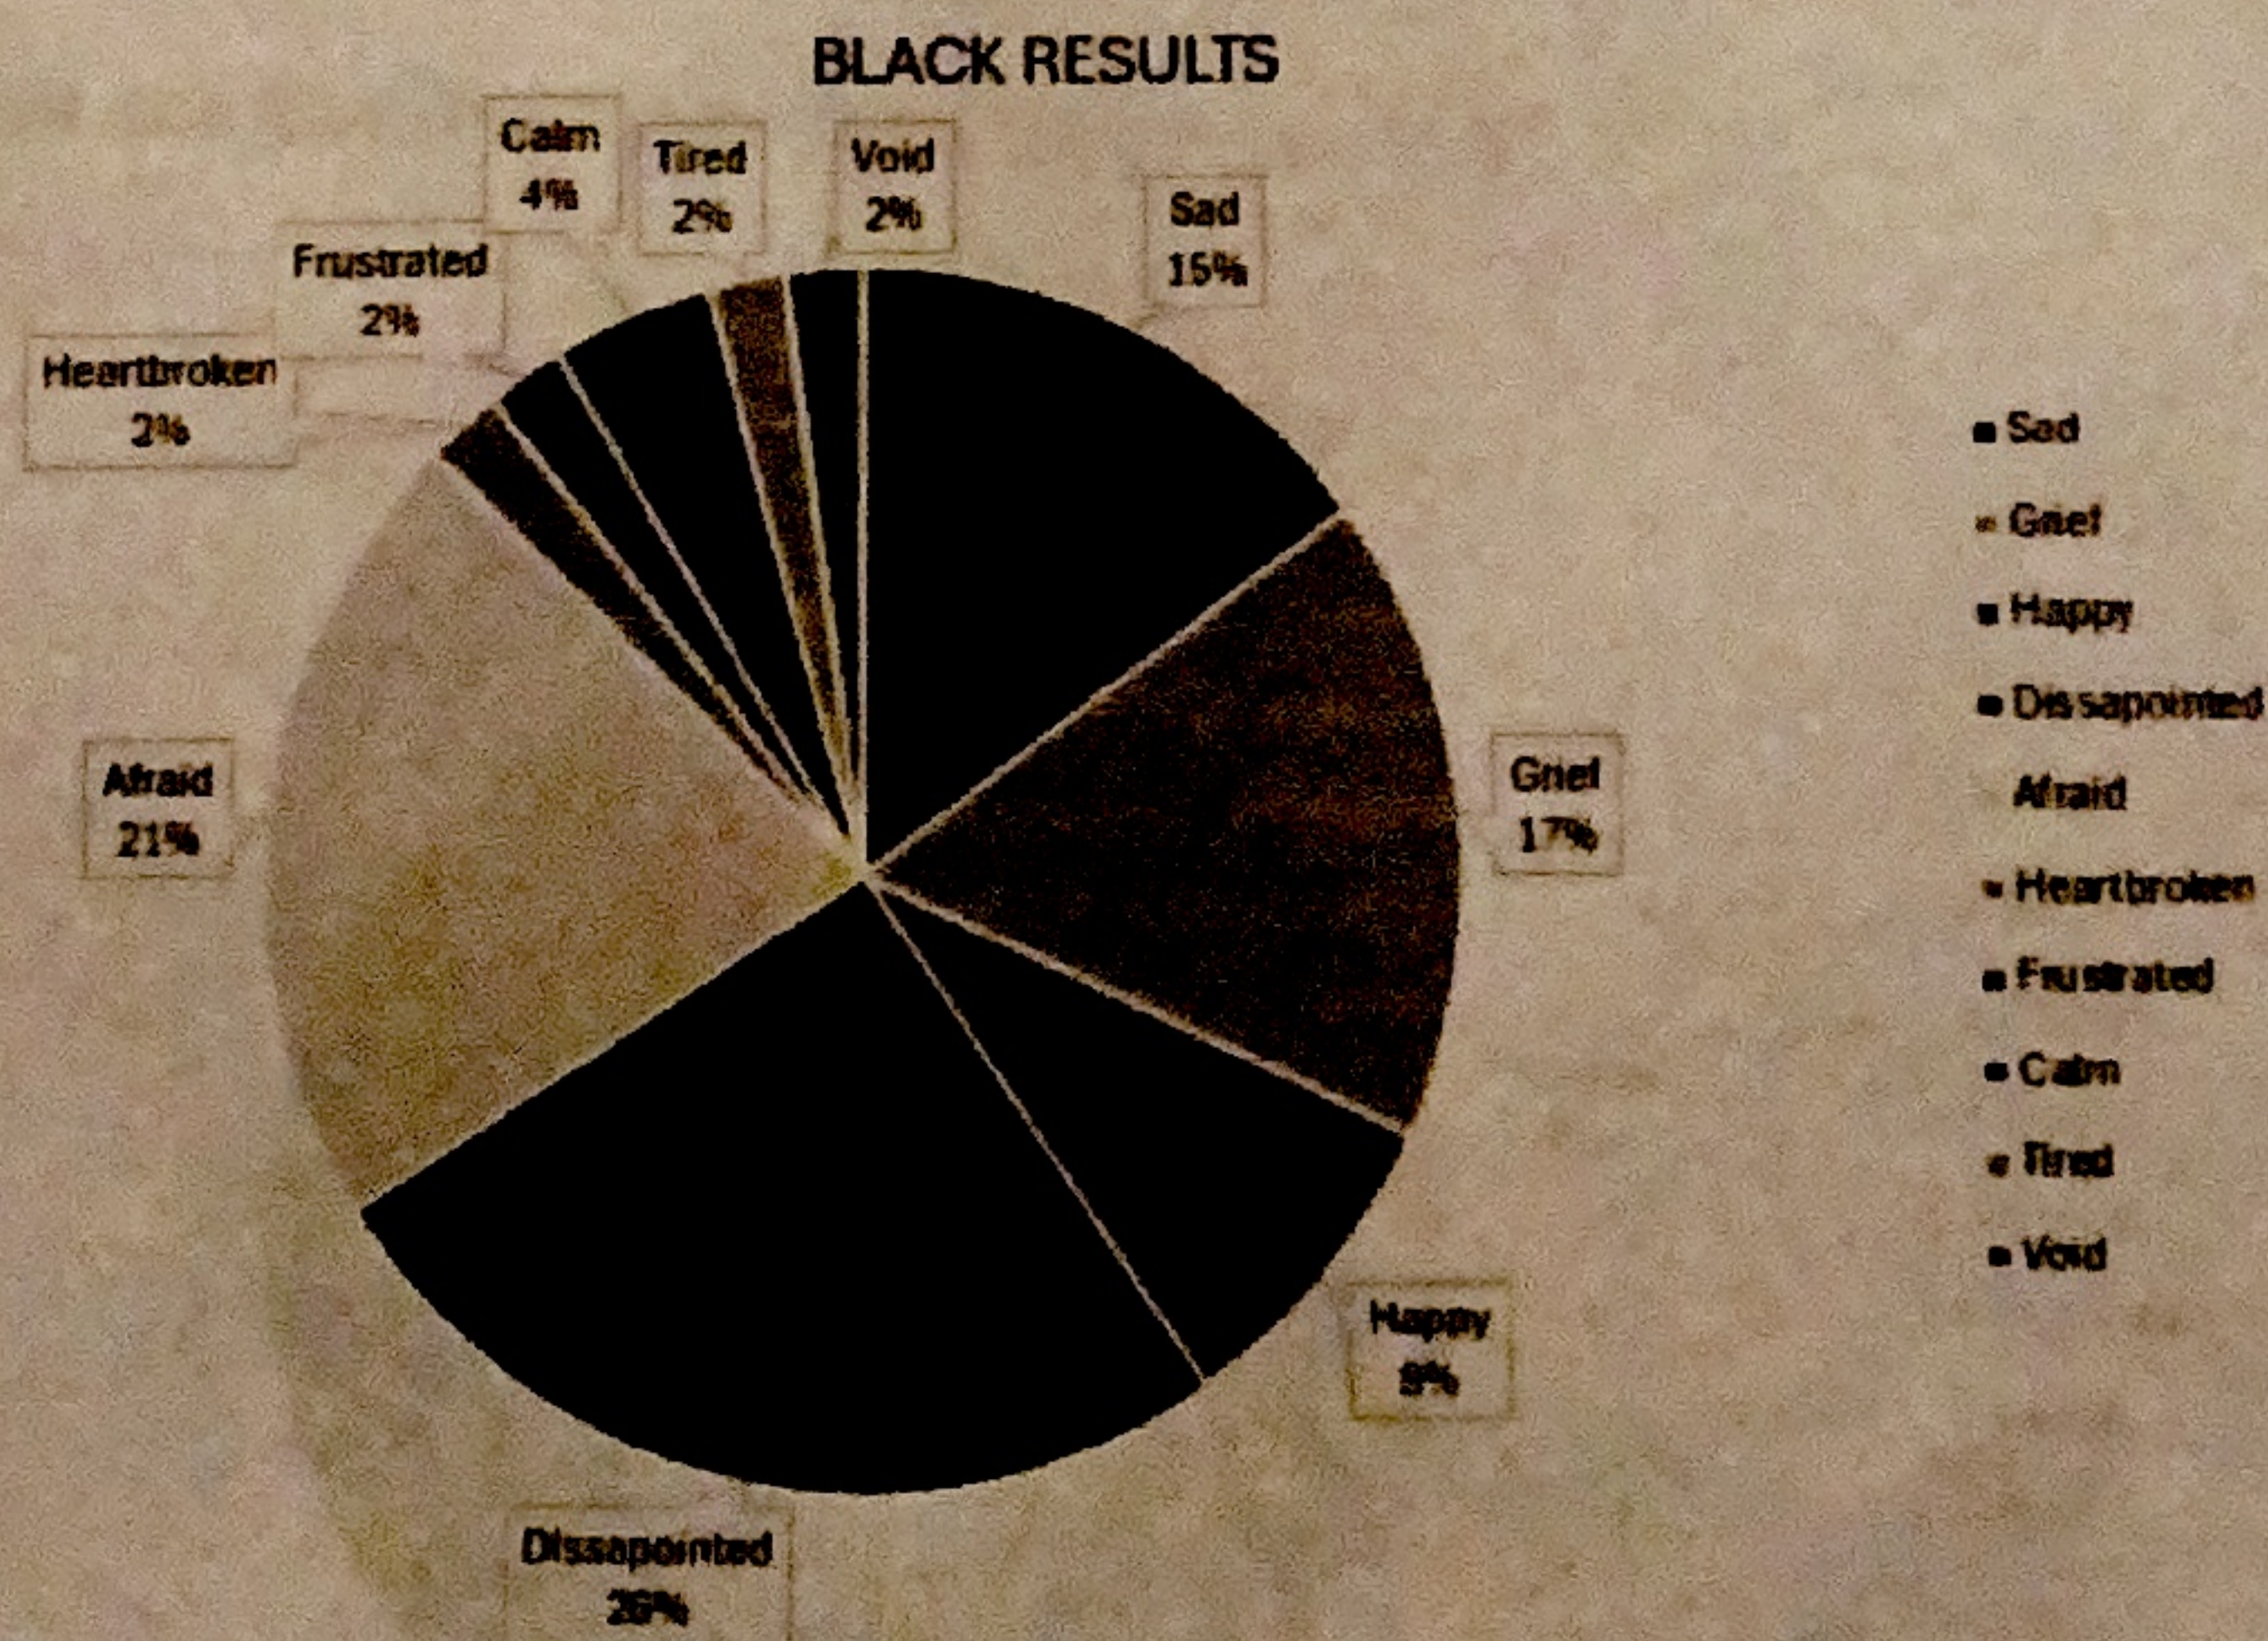

47 responses

Nearly half of the people surveyed say orange makes them feel nervous or cautious

Black - What emotion does this colour make you feel?

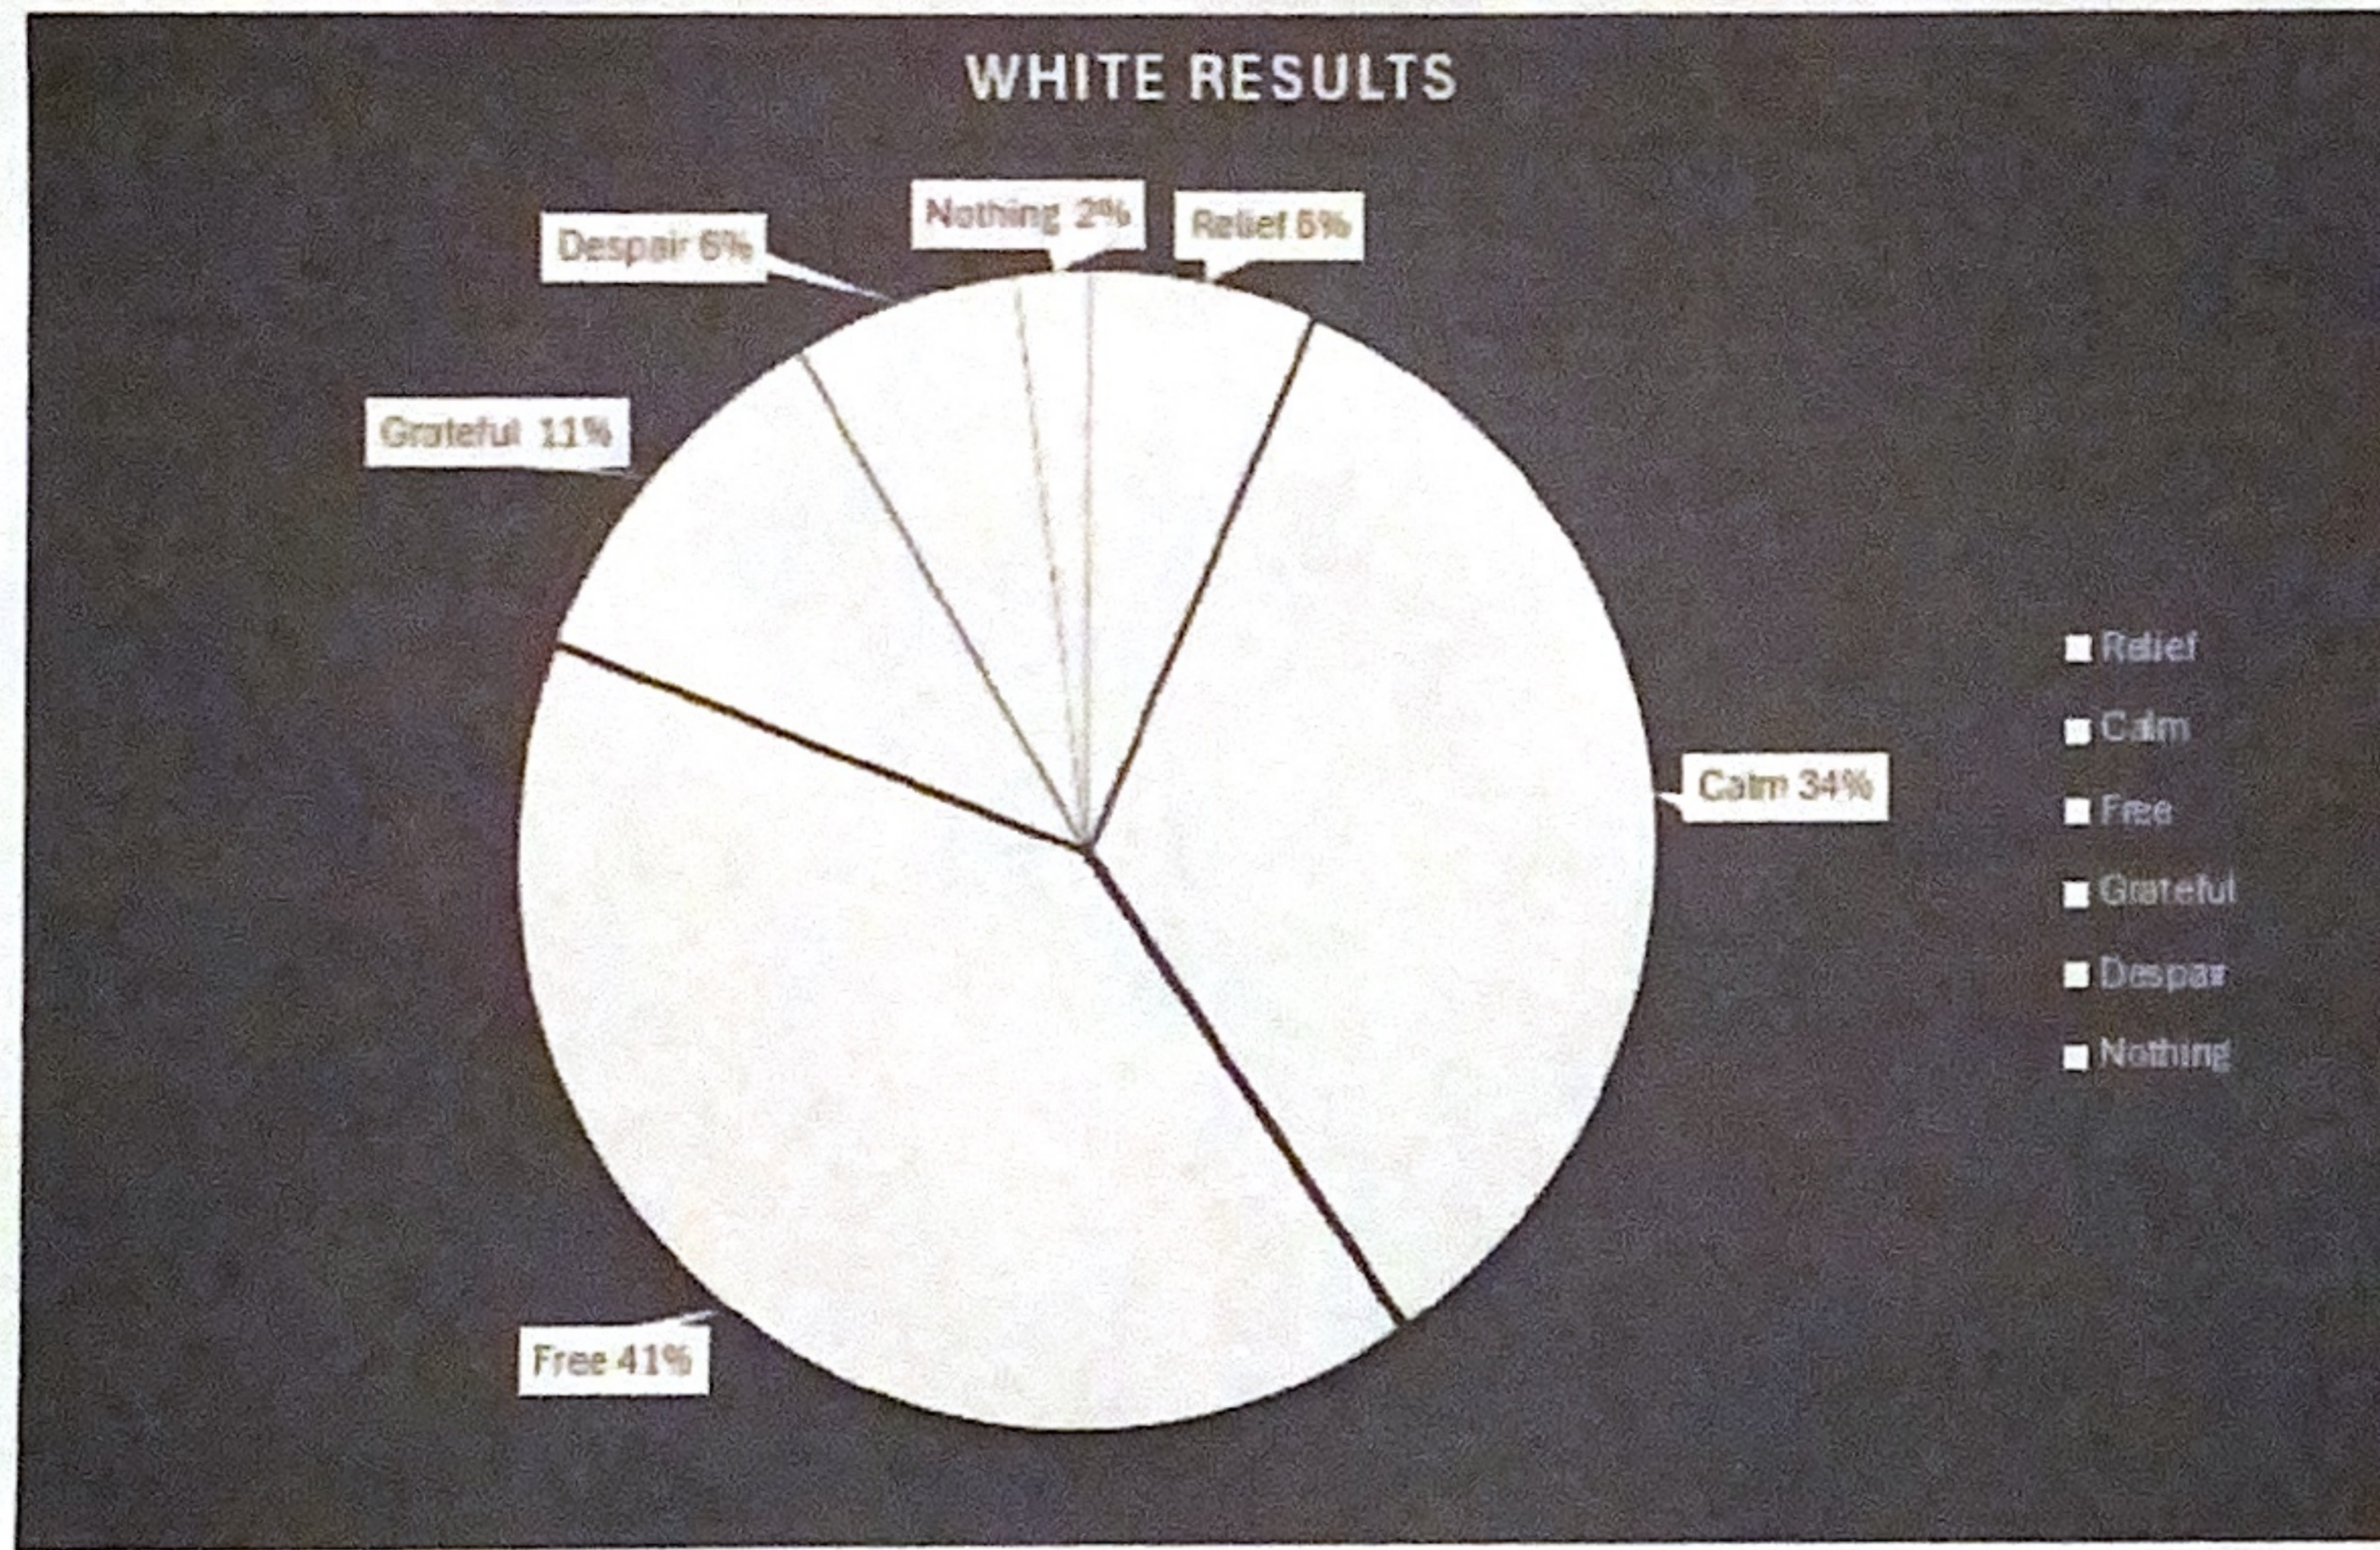

47 responses

12% of people surveyed felt positive (happy or calm) while the remaining felt black made them feel emotions of sadness (grief, disappointed, emptiness, heartbreak)

White - What emotion does this colour make you feel?

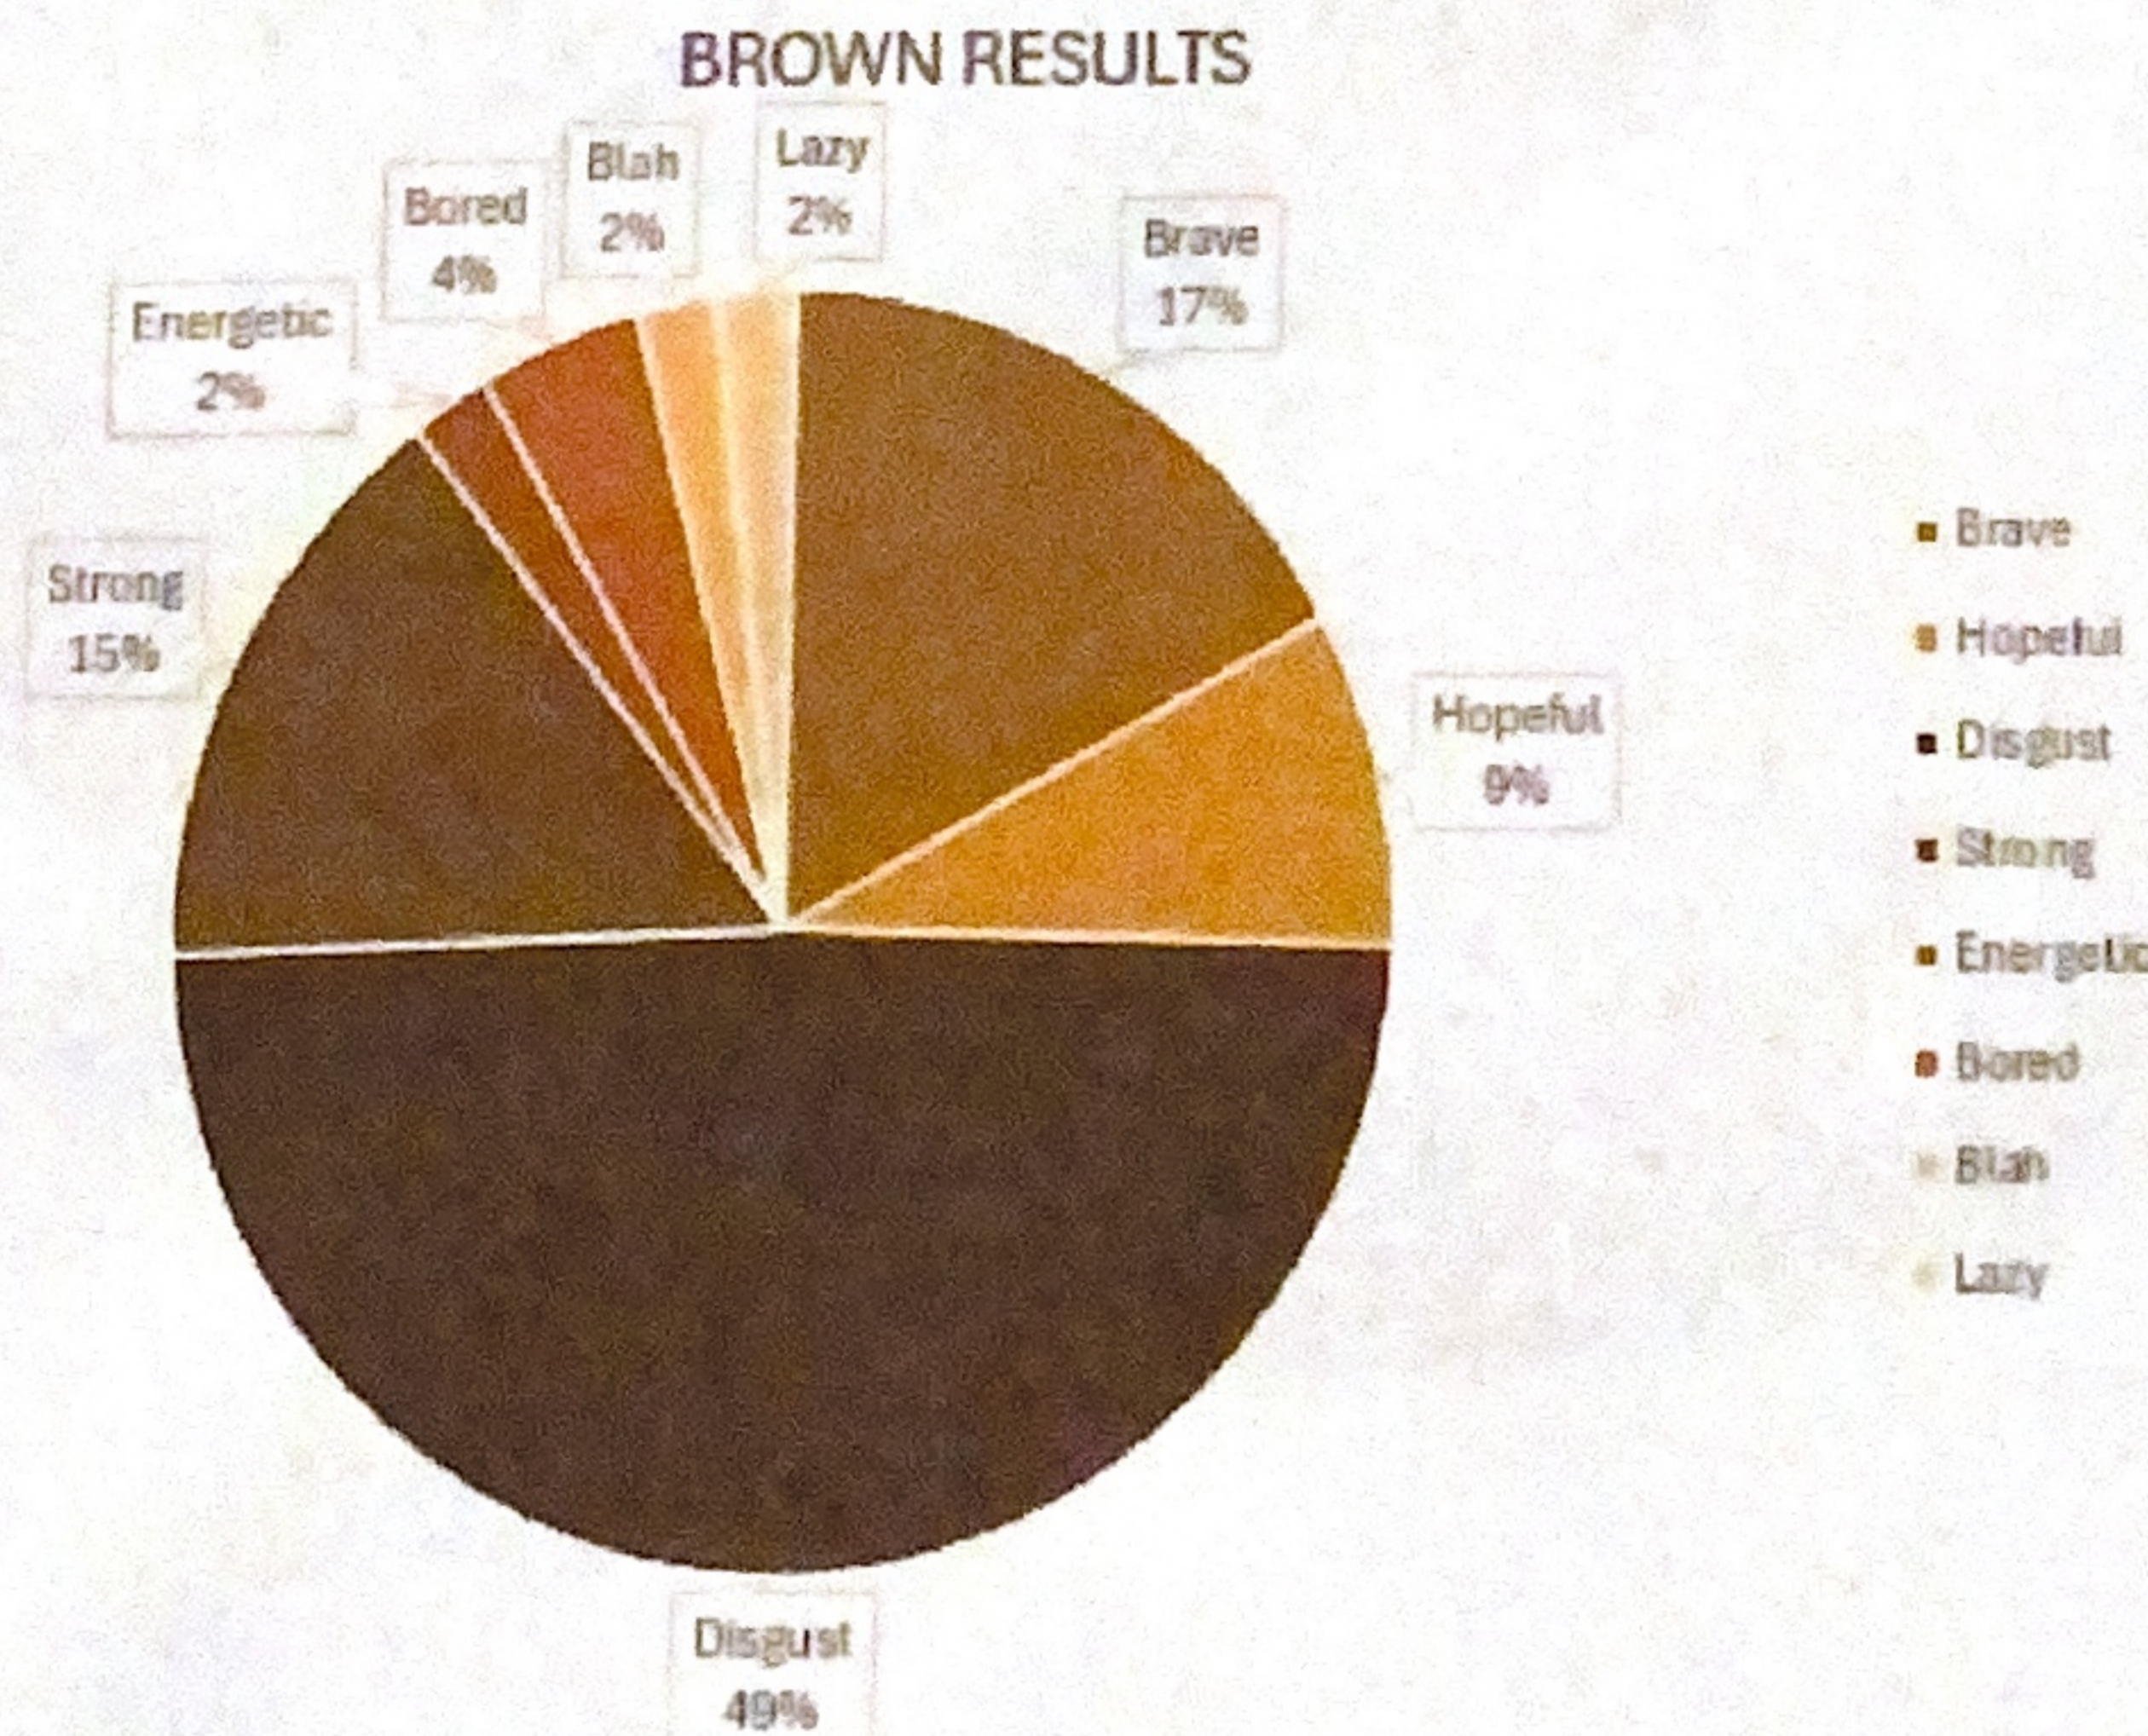

47 responses

91.4% of people surveyed say white makes them feel free, calm, grateful and relieved

Brown - What emotion does this colour make you feel?

47 responses

Over half the people surveyed said brown made them feel disgust however, over 30% of people felt brave and strong when seeing the colour brown
