

# Our logbook

made by : Reha naidu Dasari

## *Starting date: Jan 2 2026*

*I was analysing with my partner what subject to take for the project, and brainstorming my project*

## *When did we start the project: Jan 4 2026*

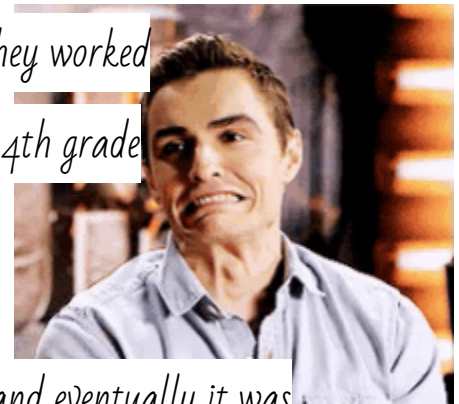

*We started researching my information and citations, took down our notes, and watched some videos on how to build.*

## *When did we start over-viewing the subject: Jan 8, 2026*

*We started getting into how the water wheels worked and planned what to include and what not to choose.*

## *When did we start our research: Feb 3, 2026*

*I got some videos on how to make a water wheels that can be functional which kinda helped? But I was confident about what we were going to do, and they worked Well, thanks to my partner's help, as she was in the science fair in 4th grade*

## *What to work on after: Feb 5 to Mar 3*

*As the project was calmly I slowly worked on my Cysf platform, and eventually it was almost done. I started to work on my important questions, and also started analysing my data, asking questions and clarifying my doubts with my teachers. They were super*

*helpful as they gave me these questions that helped me on the platform. As I completed my log book, I researched more about the history of water wheels and how they used water wheels in those cenceries we made ourselves some questions which applied and helped. It was hard as it was our first try, but we're gonna try our best.*

*And.....*

*THANK YOU*
